*Student Motivation and Quality of Life in Higher Education* Marcus A. Henning, Christian U. Krägeloh, Glenis Wong-Toi, 2014-12-17 Higher education is a high stakes process involving engagement with curricula and often entails coping with the onslaught of assessments and examinations This process creates a level of intensity that impacts on the student experience in higher education It is therefore important to consider not only the motivational aspects of learning but also quality of life issues as they have profound effects on students Quality of life affects the way students interact with their formal education and has wide reaching effects on future careers and their ability to coordinate everyday events Integrating these two concepts student motivation and quality of life brings together the explicit elements that underpin learning in the higher education context creating links between the affective and social aspects of the student life This synthesis is integral to improving student retention and quality of life and has important ramifications for educationalists administrators pastoral care and academic support service personnel and students themselves Some highlights of the book include Applied Positive Psychology in Higher Education Internationalisation and Quality of Life A Taiwanese Perspective The Computer Assisted Learning for the Mind CALM Website Teaching Skills to Increase Resilience The Oxford University Peer Support Programme Addressing the Wellbeing of Students Higher Education and Student Stress Reclaiming Light Liberty and Learning

Improving academic quality of life through attribution and motivation focused counselling **Resources in Education**, 2001-04 *Teach Students How to Learn* Sandra Yancy McGuire, 2023-07-03 Co published with NISOD Miriam a freshman Calculus student at Louisiana State University made 37.5% on her first exam but 83% and 93% on the next two Matt a first year General Chemistry student at the University of Utah scored 65% and 55% on his first two exams and 95% on his third These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book What is preventing your students from performing according to expectations Sandra McGuire offers a simple but profound answer If you teach students how to learn and give them simple straightforward strategies to use they can significantly increase their learning and performance For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success This book encapsulates the model and

ideas she has developed in the past fifteen years ideas that are being adopted by an increasing number of faculty with considerable effect The methods she proposes do not require restructuring courses or an inordinate amount of time to teach They can often be accomplished in a single session transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning Saundra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement First she demonstrates how introducing students to metacognition and Bloom s Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth Next she presents a specific study system that can quickly empower students to maximize their learning Then she addresses the importance of dealing with emotion attitudes and motivation by suggesting ways to change students mindsets about ability and by providing a range of strategies to boost motivation and learning finally she offers guidance to faculty on partnering with campus learning centers She pays particular attention to academically unprepared students noting that the strategies she offers for this particular population are equally beneficial for all students While stressing that there are many ways to teach effectively and that readers can be flexible in picking and choosing among the strategies she presents Saundra McGuire offers the reader a step by step process for delivering the key messages of the book to students in as little as 50 minutes Free online supplements provide three slide sets and a sample video lecture This book is written primarily for faculty but will be equally useful for TAs tutors and learning center professionals For readers with no background in education or cognitive psychology the book avoids jargon and esoteric theory
