 and deliver value to them It is not surprising therefore to hear that a large number of companies are transforming how they
 innovate not only in terms of developing new products and services but in how they are created delivered and supported to
 customers Open Innovation thinking where companies collaborate with suppliers distributors and customers to co create
 unique value is fast replacing traditional thinking that viewed innovation as a proprietary activity and marketing as a static
 one way broadcast However while there is significant advocacy and buy in for collaborating with customers there is little
 guidance for companies on how to undertake the journey from applause and appreciation to execution Only reading about
 others success stories Nike Hallmark P G Mozilla etc is not sufficient for helping a company develop a blueprint for
 themselves In Customer Driven Innovation strategy and branding consultant Gaurav Bhalla presents a concrete framework to
 help companies systematically and effectively design and implement collaborative innovation programs with their customers
 that can be applied in both business to business and business to consumer contexts The authors describe how today's
 technologies allow companies to create dynamic dialogues with their customers through shared networks virtual marketing
 techniques and blogs to develop deeper relationships that reinforce brand loyalty and ultimately drive growth They challenge

traditional approaches to market research that measure customer satisfaction from a rear window perspective and help companies and their customers look forward instead P
