As the crowd comes to supplant traditional forms of labor pain and disruption are inevitable Jeff Howe delves into both the positive and negative consequences of this intriguing phenomenon Through extensive reporting from the front lines of this revolution he employs a brilliant array of stories to look at the economic cultural business and political implications of crowdsourcing How were a bunch of part time dabblers in finance able to help an investment company consistently beat the market Why does Procter Gamble repeatedly call on enthusiastic amateurs to solve scientific and technical challenges How can companies as diverse as iStockphoto and Threadless employ just a handful of people yet generate millions of dollars in revenue every year The answers lie within these pages The blueprint for crowdsourcing originated from a handful of computer programmers who showed that a community of like minded peers could create better products than a corporate behemoth like Microsoft Jeff Howe tracks the amazing migration of this new model of production showing the potential of the Internet to create human networks that can divvy up and make quick work of otherwise overwhelming tasks One of the most intriguing ideas of Crowdsourcing is that the knowledge to solve intractable problems a cure for cancer for instance may already exist within the warp and weave of this infinite and as yet largely untapped resource But first Howe proposes we need to banish preconceived notions of how such problems are solved The very concept of crowdsourcing stands at odds with centuries of practice Yet for the digital natives soon to enter the workforce the technologies and principles behind crowdsourcing are perfectly intuitive This generation collaborates shares remixes and creates with a fluency and ease the rest of us can hardly understand Crowdsourcing just now starting to emerge will in a short time simply be the way things are done
