Nature of Science for Social Justice Hagop A. Yacoubian, Lena Hansson, 2020-09-08 This edited volume brings closer two contemporary science education research areas Nature of Science NOS and Social Justice SJ It starts a dialogue on the characteristics of NOS for SJ with the purpose of advancing the existing discussion and creating new avenues for research Using a variety of approaches and perspectives the authors of the different chapters engage in a dialogue on the construct of NOS for SJ its characteristics as well as ways of addressing it in science classrooms Issues addressed are related to why a school science aiming at SJ should address NOS what NOS related content skills and attitudes form the basis when aiming at SJ and how school science can address NOS for SJ Through a set of theoretical and empirical chapters the authors suggest answers but they also pose new questions on what NOS for SJ can

mean and what issues need to be taken into consideration in future research and practice Chapter Nature of Science for Social Justice Why What and How is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Science Education Keith S. Taber, Ben Akpan, 2016-12-27 This book comprises a wide range of scholarly essays introducing readers to key topics and issues in science education Science education has become a well established field in its own right with a vast literature and many active areas of scholarship Science Education An International Course Companion offers an entry point for students seeking a sound but introductory understanding of the key perspectives and areas of thinking in science education Each account is self contained and offers a scholarly and research informed introduction to a particular topic theme or perspective with both citations to key literature and recommendations for more advanced reading Science Education An International Course Companion allows readers such as those preparing for school science teaching or seeking more advanced specialist qualifications to obtain a broad familiarity with key issues across the field as well as guiding wider reading about particular topics of interest The book therefore acts as a reader to support learning across courses in science education internationally The broad coverage of topics is such that that the book will support students following a diverse range of courses and qualifications The comprehensive nature of the book will allow course leaders and departments to nominate the book as the key reader to support students their core course companion in science education

Relevant Chemistry Education Ingo Eilks, Avi Hofstein, 2015-07-22 This book is aimed at chemistry teachers teacher educators chemistry education researchers and all those who are interested in increasing the relevance of chemistry teaching and learning as well as students perception of it The book consists of 20 chapters Each chapter focuses on a certain issue related to the relevance of chemistry education These chapters are based on a recently suggested model of the relevance of science education encompassing individual societal and vocational relevance its present and future implications as well as its intrinsic and extrinsic aspects Two highly distinguished chemical educators Ingo Eilks and Avi Hofstein have brought together 40 internationally renowned colleagues from 16 countries to offer an authoritative view of chemistry teaching today Between them the authors in 20 chapters give an exceptional description of the current state of chemical education and signpost the future in both research and in the classroom There is special emphasis on the many attempts to enthuse students with an understanding of the central science chemistry which will be helped by having an appreciation of the role of the science in today's world Themes which transcend all education such as collaborative work communication skills attitudes inquiry learning and teaching and problem solving are covered in detail and used in the context of teaching modern chemistry The book is divided into four parts which describe the individual the societal the vocational and economic and the non formal dimensions and the editors bring all the disparate leads into a coherent narrative that will be highly satisfying to experienced and new researchers and to teachers with the daunting task of teaching such an intellectually demanding subject Just a brief glance at the index and the references will convince anyone

interested in chemical education that this book is well worth studying it is scholarly and readable and has tackled the most important issues in chemical education today and in the foreseeable future Professor David Waddington Emeritus Professor in Chemistry Education University of York United Kingdom *MasterClass in Science Education* Keith S. Taber, 2018-12-13

Worried about teaching natural selection submicroscopic particle models or circuits Keith S Taber explores a range of issues faced in secondary science teaching and discusses strategies for teaching the nature of scientific knowledge making practical work effective and challenging gifted young scientists MasterClass in Science Education shows how to become a master science teacher by developing and adopting the habits and mind set of a teacher as scientist The author introduces the three pillars of this approach subject knowledge pedagogic knowledge and classroom research The body of subject knowledge in the sciences is both vast and constantly evolving as it is challenged updated and developed and this text supports you to understand the dynamic nature of knowledge and the implications this has for your teaching Taber shows how to use a knowledge in action approach enacting knowledge in the complex and dynamic classroom environment He supports you to critically examine classroom experiences drawing on a wide range of research informed perspectives that offer insights into facilitating effective student learning He also guides you to understand how to use recommendations from published research studies as components of a toolkit to improve your teaching and learning **Inquiry in Education, Volume II** Bruce M. Shore, Mark W. Aulls, Marcia A. B. Delcourt, 2017-09-25 A companion to Inquiry in Education Volume I The Conceptual Foundations for Research as a Curricular Imperative Volume I presents the arguments for the necessary inclusion of inquiry driven learning and instructional experiences in any modern school curriculum Volume II illustrates how educators in a range of settings have dealt with obstacles to successful implementation of inquiry based approaches Each chapter focuses on a particular barrier or barriers and has a primary focus on learners teachers or the curriculum The stories reflect highly varied learning contexts ranging from infancy to university from the classroom to a range of out of school contexts **Abolish Criminology** Viviane Saleh-Hanna, Jason M. Williams, Michael J Coyle, 2023-08-25 Abolish Criminology presents critical scholarship on criminology and criminal justice ideologies and practices alongside emerging freedom driven visions and practices for new world formations The book introduces readers to a detailed history and analysis of crime as a concept and its colonizing trajectories into existence and enforcement These significant contexts buried within peculiar academic histories and classroom practices are often overlooked or unknown outside academic spaces This causes the impact of criminology's racializing gendering sexualizing histories to extend and grow through criminology's creation of crime as a very limiting way of thinking about violence and what can be done about it These limitations allow the concept of crime to be weaponized and enforced through the criminal legal system Abolish Criminology offers an accessible critical study of criminology in written visual and poetic forms and through the perspectives of university students professors imprisoned and formerly imprisoned scholars poets and visual artists This allows readers to engage in multi sensory interdisciplinary and

multi perspective teachings on criminology s often discussed but seldom interrogated mythologies on violence and danger while bringing to light the wide reaching enforcements of violence through criminology s research theories agencies and dominant cultures Abolish Criminology serves the needs of undergraduate and graduate students and educators in the social sciences arts and humanities It will also appeal to scholars researchers policy makers activists community organizers social movement builders and various reading groups in the general public who are grappling with increased critical public discourse on policing and criminal legal reform or abolition
