Handbook On The Politics Of Regulation Handbook On The Politics Of Regulation:

Handbook on the Politics of Regulation David Levi-Faur, 2011 To my mind this Handbook has accomplished a major task mapping and analysing the intellectual terrain around today's regulatory fabric and tomorrow's regulatory challenges. It is to be commended for not only taking on that task but also for succeeding so well. It is rare for the blurb on a book cover to match up to the text inside. In this Handbook it does. The Handbook gives extraordinary coverage and is comprehensive, engaging, informed, and quite frankly exciting. What a great combination. Graeme Hodge, Australian Journal of Political Science.

Handbook on the Politics of Regulation David Levi-Faur, 2011-01-01 Political science has leapfrogged law, economics, and sociology to become the dominant discipline contributing to regulatory studies. David Levi-Faur's volume taps the rich veins of regulatory scholarship that have made this the case. It brings together the talented new network of politics scholars intrigued by the importance of the changing nature of state and non-state regulation. Their fresh insights complement important new work by established stars of the field. Definitely a book to have on your shelf when in search of exciting theoretical approaches to politics. John Braithwaite, Australian National University. Regulation in its manifold forms is the central process of contemporary governance as it seeks to blend the dynamism of market economies with responsiveness to political and normative demands for health, safety, environmental protection, and fairness. Understanding regulation's varieties, vulnerabilities, and virtues has become a significant focus of academic research and theory. This volume provides an extraordinary survey of research in that field, a survey remarkable in its comprehensiveness, outstanding in the quality of the contributions by leading regulatory scholars from different nations and academic disciplines. Robert A. Kagan, University of California, Berkeley, US. An authoritative collection by a range of contributors with outstanding reputations in the field. Michael Moran, WJ MacKenzie Professor of Government. This is an extraordinarily useful one-stop shop for a wide range of traditions and approaches to the political aspects of regulation. David Levi-Faur has assembled a fine collection that, by reporting on the state of the art, also shows the way ahead for a discipline that has to capture and explain dramatic changes in real-world regulatory philosophies and policies. Claudio Radaelli, University of Exeter, UK. This is an unusually impressive edited volume. Its contributors include the leading academic experts on government regulation from around the world. Its several clearly written and informative essays address the most important topics, issues, and debates that have engaged students of regulatory politics. I strongly recommend this volume to anyone interested in understanding the breadth and depth of contemporary scholarship on the political dimensions of regulation. David Vogel, University of California, Berkeley, US. This unique Handbook offers the most up-to-date and comprehensive state of the art reviews of the politics of regulation. It presents and discusses the core theories and concepts of regulation in response to the rise of the regulatory state and regulatory capitalism and in the context of the golden age of regulation. Its ten sections include forty-nine chapters covering issues as diverse and varied as theories of regulation, historical perspectives on regulation, regulation of old and new media.

Autonomous Public Bodies and the Law Stéphanie De Somer, 2017-05-26 This insightful book discusses the impact of EU law on the creation and empowerment of autonomous public bodies APBs at Member State level and analyzes recent attempts of European states to rationalize delegation to APBs It examines the tensions between these trends under what conditions can APBs be considered legitimate forms of government in the light of modern conceptions of constitutionalism the rule of law and democracy values that are deeply rooted in European constitutions And to what extent do EU obligations on the independence of national regulators data protection authorities and the like conflict with those conceptions

Russia Country Study Guide Volume 1 History, National Identity, Politics IBP, Inc., 2013-08 *Russia Country Study Guide Strategic Information and Developments Volume 1 Strategic Information and Developments* **Research Handbook on Money Laundering** Brigitte Unger, Daan van der Linde, 2013-01-01 Although the practice of disguising the illicit origins of money dates back thousands of years the concept of money laundering as a multidisciplinary topic with social economic political and regulatory implications has only gained prominence since the 1980s This groundbreaking volume offers original state of the art research on the current money laundering debate and provides insightful predictions and recommendations for future developments in the field The contributors to this volume academics practitioners and government representatives from around the world offer a number of unique perspectives on different aspects of money laundering Topics discussed include the history of money laundering the scale of the problem the different types of money laundering the cost to the private sector and the effectiveness of anti money laundering policies and legislation The book concludes with a detailed and insightful synthesis of the problem and recommendations for additional steps to be taken in the future Students professors and practitioners working in economics banking finance and law will find this volume a comprehensive and invaluable resource *The Politics of Global Supply Chains* Kate MacDonald, 2014-01-14 *The Politics of Global Supply Chains* analyses the changing politics of power and distribution within contemporary global supply chains Drawing on over 300 interviews

with farmers workers activists businesses and government officials in garment and coffee sector supply chains the book shows how the increased involvement of non state actors in supply chain governance is re shaping established patterns of global political power responsibility and accountability These emerging supply chain governance systems are shown to be multi layered and politically contested as transnational governance schemes interact with traditional state governance arrangements in both complementary and conflicting ways The book s analysis of changes to the relationship between state and non state actors within transnational governance processes will be of particular interest to scholars and students of globalisation global governance and regulation The Politics of Global Supply Chains also suggests some practical ways by which the effectiveness and accountability of supply chain governance could be strengthened which will interest both scholars and practitioners in fields of global business regulation and corporate social responsibility Conclusions are relevant to the business and civil society actors who participate directly in non state governance schemes and to state regulators whose distinctive governance capacities could play a much greater role than at present in supporting transnational non state governance processes

Anti-Politics, Depoliticization, and Governance Paul Fawcett,Matthew Flinders,Colin Hay,Matthew Wood,2017-10-06 There is a mounting body of evidence pointing towards rising levels of public dissatisfaction with the formal political process Depoliticization refers to a more discrete range of contemporary strategies that add to this growing trend towards anti politics by either removing or displacing the potential for choice collective agency and deliberation This book examines the relationship between these two trends as understood within the broader shift towards governance It brings together a number of contributions from scholars who have a varied range of concerns but who nevertheless share a common interest in developing the concept of depoliticization through their engagement with a set of theoretical conceptual methodological and empirical questions This volume explores these questions from a variety of different perspectives and uses a number of different empirical examples and case studies from both within the nation state as well as from other regional global and multi level arenas In this context this volume examines the potential and limits of depoliticization as a concept and its position and contribution in the nexus between the larger and more established literatures on governance and anti politics

The Palgrave Encyclopedia of Urban and Regional Futures Robert C. Brears,2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment low wage growth scarce financial resources climate change waste and pollution and rising

urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions

Regulatory Politics in an Age of Polarization and Drift Marc Allen Eisner, 2017-02-24 Regulatory change is typically understood as a response to significant crises like the Great Depression or salient events that focus public attention like Earth Day 1970 Without discounting the importance of these kinds of events change often assumes more gradual and less visible forms But how do we see change and what institutions and processes are behind it In this book author Marc Eisner brings these questions to bear on the analysis of regulatory change walking the reader through a clear eyed and careful examination of the dynamics of regulatory change since the 1970s social regulation and institutional design forms of gradual change including conversion layering and drift gridlock polarization and the privatization of regulation financial collapse and the anatomy of regulatory failure Demonstrating that transparency and accountability the hallmarks of public regulation are increasingly absent and that deregulation was but one factor in our most recent significant financial collapse the Great Recession this book urges readers to look beyond deregulation and consider the broader political implications for our current system of voluntary participation in regulatory programs and the proliferation of public private partnerships This book provides an accessible introduction to the complex topic of regulatory politics ideal for upper level and graduate courses on regulation government and business bureaucratic politics and public policy

Competitiveness and Death Gary Winslett, 2021-03-09 Competitiveness and Death examines the increase and reduction of regulatory barriers to trade across three industries environmental labor and safety rules on automobiles consumer protection regulations on meat and intellectual property regulations on medicines The fundamental negotiation in trade and regulatory policymaking occurs between businesses activists and government officials Gary Winslett builds on new trade theories to explain when and why businesses are most likely to lobby governments to reduce these regulatory trade barriers He argues that businesses prevail when they can connect with broader concerns about national economic competitiveness He examines how activist organizations overcome collective action problems and defend regulatory differences arguing that they succeed when they can link their desire for barriers with preventing needless death Competitiveness and Death provides a political companion to

new trade theories in economics questioning cleavage based explanations of trade politics demonstrating the underappreciated importance of activists suggesting the limits of globalization providing in depth examination of previously ignored trade negotiations qualifying the California Effect the shift toward stricter regulatory standards and showing the relative rarity of regulations used as disguised protectionism

The Law, Economics and Politics of International Standardisation Panagiotis Delimatsis, 2015-12-11 This book examines the foundations of international standard setting from a multidisciplinary perspective

The Rise of the Regulatory State of the South Navroz K. Dubash, Bronwen Morgan, 2013-06-27 The 1990s and 2000s have witnessed a spurt of energetic institution building in the developing world as regulatory agencies emerge to take over the role of the executive in key sectors This rise of the regulatory state of the south is barely noticed both by scholars of regulation and of development let alone adequately documented and theorized Yet the consequences for the role of the state and modalities of governance in the south are substantial as politically charged decisions are handed over to formally technocratic agencies creating new arenas and forms of contestation over the gains and losses from development decisions Moreover this shift in the developing world comes at a time when the regulatory state in the north is under considerable stress from the global financial crisis Understanding the regulatory state of the south and particularly forms of accommodation to political pressures could stimulate a broader conversation around the role of the regulatory state in both north and south This volume seeks to provoke such a discussion by empirically exploring the emergence of regulatory agencies of a range of developing countries across Asia Africa and Latin America The cases focus on telecommunications electricity and water sectors that have often been at the frontlines of this transition The central question for the volume is Are there distinctive features of the regulatory state of the South shaped by the political economic context of the global south in the last two decades To assist in exploring this question the volume includes brief commentaries on the case studies from a range of disciplines development economics law and regulation development sociology and comparative politics Collectively the volume seeks to shape the contours of a productive inter disciplinary conversation on the emergence of a significant empirical phenomenon the rise of regulatory agencies in the developing world with implications both for the study of regulation and the study of development
