Applications of Small Unmanned Aircraft Systems J.B. Sharma, 2019-10-18 Advances in high spatial resolution mapping capabilities and the new rules established by the Federal Aviation Administration in the United States for the operation of Small Unmanned Aircraft Systems sUAS have provided new opportunities to acquire aerial data at a lower cost and more safely versus other methods A similar opening of the skies for sUAS applications is being allowed in countries across the world Also sUAS can access hazardous or inaccessible areas during disaster events and provide rapid response when needed Applications of Small Unmanned Aircraft systems Best Practices and Case Studies is the first book that brings together the best practices of sUAS applied to a broad range of issues in high spatial resolution mapping projects Very few sUAS pilots have the knowledge of how the collected imagery is processed into value added mapping products that have commercial and or academic import Since the field of sUAS applications is just a few years old this book covers the need for a compendium of case studies to guide the planning data collection and most importantly data processing and map error issues with the range of sensors available to the user community Written by experienced academics and professionals this book serves as a guide on how to formulate sUAS based projects from choice of a sUAS flight planning for a particular application sensors and data acquisition data processing software mapping software and use of the high spatial resolution maps produced for particular types of geospatial modeling Features Focus on sUAS based data acquisition and processing into map products Broad range of case studies by highly experienced academics Practical guidance on sUAS hardware sensors and software utilized Compilation of workflow insights from expert professors and professionals Relevant to academia government and industry Positional and thematic map accuracy UAS curriculum development and workflow replicability issues This book would be an excellent text for upper level undergraduate to graduate level sUAS mapping application courses It is also invaluable as a reference for educators designing sUAS based curriculum as well as for potential sUAS users to assess the scope of mapping projects that can be done with this technology

Performance Evaluation for Network Services, Systems and Protocols Stênio

Fernandes,2017-03-21 This book provides a comprehensive view of the methods and approaches for performance evaluation of computer networks It offers a clear and logical introduction to the topic covering both fundamental concepts and practical aspects It enables the reader to answer a series of questions regarding performance evaluation in modern computer networking scenarios such as What where and when to measure Which time scale is more appropriate for a particular measurement and analysis Experimentation simulation or emulation Why and How do I best design a sound performance evaluation plan The book includes concrete examples and applications in the important aspects of experimentation simulation and emulation and analytical modeling with strong support from the scientific literature It enables the identification of common shortcomings and highlights where students researchers and engineers should focus to conduct sound performance evaluation This book is a useful guide to advanced undergraduates and graduate students network engineers and researchers who plan and design proper performance evaluation of computer networks and services Previous knowledge of computer networks concepts mechanisms and protocols is assumed Although the book provides a quick review on applied statistics in computer networking familiarity with basic statistics is an asset It is suitable for advanced courses on computer networking as well as for more specific courses as a secondary textbook *The Dynamics of International Negotiation*

Bertram I. Spector,2022-09-16 This book explores the dynamics of international negotiations from the perspectives of researchers and practical negotiators Reinforcing the idea that the study of negotiation is not merely an academic endeavor the essays reflect the author s lifetime experiences as a negotiation researcher and provider of analytical support to international negotiation teams Addressing a wide range of critical issues such as creativity and experimentation psychological dynamics avoiding incomplete agreements engineering the negotiation context reframing negotiations for development conflicts understanding what matters when implementing agreements utilizing decision support systems engaging new actors and expanding core values each chapter opens new doors on our conceptual and practical understanding of international negotiations The author introduces new ways of understanding and explaining the negotiation process from different intellectual perspectives The goal of this book is to resolve many critical unanswered questions by stimulating new research on these dynamics and developing new approaches that can help negotiation practitioners be more effective The book will be used in university courses on international negotiation and conflict resolution and provide a useful resource for researchers policymakers practitioners NGOs donor organizations and grant giving organizations *The Handbook of Group Communication Theory and Research*

Lawrence R. Frey,Dennis Gouran,Marshall Scott Poole,1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication s 50 year history With contributions from the most experienced and respected scholars in the field the editors Lawrence R Frey Dennis S Gouran and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices The volume is

divided into six broad areas of communication scholarship Foundations of group communication theory and research Individuals and group communication Task and relational group communication Group communication processes Group communication facilitation Group communication contexts and applications The sections serve as a crossroads where various paths pursued in each area meet summarize and suggest new maps and roads that need to be followed in the future Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars this important resource will be an unrivalled tool for scholars researchers educators practitioners and students alike

A Treatise on Many-valued Logics Siegfried Gottwald, 2001 A growing interest in many valued logic has developed which to a large extent is based on applications intended as well as already realised ones These applications range from the field of computer science e g in the areas of automated theorem proving approximate reasoning multi agent systems switching theory and program verification through the field of pure mathematics e g in independence of consistency proofs in generalized set theories or in the theory of particular algebraic structures into the fields of humanities linguistics and philosophy

Mathematical Aspects of Numerical Solution of Hyperbolic Systems A.G. Kulikovskii, N.V. Pogorelov, A. Yu. Semenov, 2000-12-21 This important new book sets forth a comprehensive description of various mathematical aspects of problems originating in numerical solution of hyperbolic systems of partial differential equations The authors present the material in the context of the important mechanical applications of such systems including the Euler equations of gas dynamics magnetohydrodynamics MHD shallow water and solid dynamics equations This treatment provides for the first time in book form a collection of recipes for applying higher order non oscillatory shock capturing schemes to MHD modelling of physical phenomena The authors also address a number of original nonclassical problems such as shock wave propagation in rods and composite materials ionization fronts in plasma and electromagnetic shock waves in magnets They show that if a small scale higher order mathematical model results in oscillations of the discontinuity structure the variety of admissible discontinuities can exhibit disperse behavior including some with additional boundary conditions that do not follow from the hyperbolic conservation laws Nonclassical problems are accompanied by a multiple nonuniqueness of solutions The authors formulate several selection rules which in some cases easily allow a correct physically realizable choice This work systematizes methods for overcoming the difficulties inherent in the solution of hyperbolic systems Its unique focus on applications both traditional and new makes Mathematical Aspects of Numerical Solution of Hyperbolic Systems particularly valuable not only to those interested the development of numerical methods but to physicists and engineers who strive to solve increasingly complicated nonlinear equations
