Handbook of Research on the Education of Young Children Olivia N. Saracho, 2019-10-30 *The Handbook of Research on the Education of Young Children* is the essential reference on research on early childhood education throughout the world. This outstanding resource provides a comprehensive research overview of important contemporary issues as well as the information necessary to make knowledgeable judgments about these issues. Now in its fourth edition, this handbook features all new sections on social emotional learning, non-cognitive assessment, child development, early childhood education content areas, teacher preparation, technology, multimedia, and English language learners. With thorough updates to chapters and references, this new edition remains the cutting edge resource for making the field's extensive knowledge base readily available and accessible to researchers and educators. It is a valuable resource for all of those who work and study in the field of early childhood education, including researchers, educators, policy makers, librarians, and school administrators. This volume addresses critical up-to-date research on several disciplines such as child development, early childhood education, psychology, curriculum, teacher preparation, policy evaluation, strategies, technology, and multimedia exposure.

Research Partnerships in Early Childhood Education Judith Duncan, 2013-11-19 Duncan and Conner demonstrate how collaborative research on early childhood education results in gains for educators, researchers, and children alike. Drawing on examples of successful partnerships from Canada, Australia, and New Zealand, they set out the successes, struggles, insights, and opportunities that come from such partnerships.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co-published by Routledge for the American Educational Research Association (AERA), *Educational Policy* continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1) disciplinary foundations of educational policy, 2) methodological perspectives, 3) the policy process, 4) resources management and organization, 5) teaching and learning policy, 6) actors and institutions, and 7) education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are

objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net>
