Moudud,2010-01-01 Economists from all heterodox

traditions of political economy will benefit from reading this book both for its confirmation of many of the basic precepts of classical Marxian and Harroddian economics and the challenges it poses for its trenchant Post Keynesian Kaleckian critics for whom short period analytics of effective demand can and should be extended to long period analysis While his critique of the principle of effective demand for the long run would leave many Post Keynesians uncompromising the strong Keynesian view held by the author on the necessity for public sector capital budgeting and a developmental state upon which ought to be grafted a long term growth policy based on public investment would certainly find strong resonance in the context of the global economic crisis Mario Seccareccia University of Ottawa Canada and Editor of the International Journal of Political Economy Jamee K Moudud's book is in the best tradition of dynamic economics stemming from the work of Harrod and Kalecki Moudud demonstrates a solid command of the intellectual history of his subject His insightful critical survey of the growth literature focuses on an often neglected dimension of the topic i.e. the question of how real world firms make decisions about capacity utilization and capacity creation This discussion grounds Moudud's subsequent theoretical analysis of the disequilibrium dynamics of cyclical growth The book is that rarest of things both a useful teaching tool and an original contribution in its own right Graduate students will find it a superb introduction to the analytical issues that are at the center of economists' debates about growth economic development and the business cycle Growth theorists will find in it much to stimulate and challenge their thinking Gary Mongiovi St John's University US and Co Editor Review of Political Economy The pillar upon which this magnificent must read volume was erected is strategic competition a theory that cogently authenticates the concentration and centralization of capital This stands in stark contrast against the fanciful neoclassical perfect completion and its methodological double imperfect competition In Strategic Competition Dynamics and the Role of the State Jamee Moudud has taken a novel approach to the study of macrodynamics Here turbulence and crisis are deemed inseparable from the dynamics of capitalist economies and the last three decades of neoliberal policies are eloquently called into question Moudud also provides a timely and effective critique of both new Keynesian and post Keynesian approaches to macroeconomic theory and policy Cyrus Bina University of Minnesota Morris Campus US and an Editor of the Journal of Critical Studies on Business and Society The current economic crisis has thrown into disrepute the representative agent models at the forefront of the microfoundations agenda Jamee Moudud takes a different approach going back to first principles to re-establish the theory of the firm and the nature of market competition The result is an important addition to two ongoing quests in macroeconomics integrating the principle of effective demand into long run macrodynamics and relating aggregate outcomes to firm behaviour and the functioning of markets Mark Setterfield Trinity College US This is a very timely refreshing and challenging book an excellent contribution in the areas of competition and growth It blends beautifully the microeconomic analysis of the Oxford Research Group at the center of which is the idea of strategic competition and an extension of Harrod's work on growth The discussions of uncertainty and excess capacity and the

interpretation of Harrod's work are outstanding. This combination leads one to think about policy issues such as taxation or public investment in a novel way as the implications differ not only from those that derive from neoclassical models but also from Post Keynesian.

Economic Theories and their Relational Structures E. Klein, 1998-01-19 An examination of the foundations of contemporary theoretical economics Applying concepts from model theory formal semantics and standard tools in foundations research the author aims three targets namely a characterization of the notion empirical economic theory the determination of the epistemological and methodological status of an important class of non empirical theories in economics and the proposal of a taxonomy of economic theories based upon intended epistemological status and the descriptive or operative function of a theory

Rosenzweig, 2009-11-09 What guidance does academic research really provide to economic policy development The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance Asserting that there are no universal correspondences between policies and outcomes contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies Getting cause and effect right is essential for policy design and implementation With the goal of drawing researchers and policy makers closer this volume highlights our increasing understanding of ways to combine economic theorizing with careful thoughtful empirical work Presents an accurate self contained survey of the current state of the field Summarizes the most recent discussions and elucidates new developments Although original material is also included the main aim is the provision of comprehensive and accessible surveys **Handbook of Natural Resource and Energy** , 1993-04-08 The Handbook of Natural Resource and Energy Economics examines the current theory and sample current application methods for natural resource and energy economics This third volume deals primarily with non renewable resources It analyzes the economics of energy and minerals and includes chapters on the economics of environmental policy The Handbook provides a source reference and teaching supplement for use by professional researchers and advanced graduate students The surveys summarize not only received results but also newer developments from recent journal articles and discussion papers
