Peter Fleming, 2009-06-25 The personal was once something to be put to one side in the work place a professional manner entailed the suppression of private life and feelings Now many large corporations can be found exhorting their employees to simply be themselves This book critically investigates the increasing popularity of personal authenticity in corporate ideology and practice Rather than have workers adhere to depersonalising bureaucratic rules or homogenous cultural norms many large corporations now invite employees to simply be themselves Alternative lifestyles consumption ethics identity sexuality fun and even dissent are now celebrated since employees are presumed to be more motivated if they can just be themselves

Does this freedom to express one's authenticity in the workplace finally herald the end of corporate control To answer this question the author places this concern with authenticity within a political framework and demonstrates how it might represent an even more insidious form of cultural domination The book especially focuses on the way in which private and non work selves are prospected and put to work in the firm The ideas of Hardt and Negri and the Italian autonomist movement are used to show how common forms of association and co operation outside of commodified work are the inspiration for personal authenticity It is the vibrancy energy and creativity of this non commodified stratum of social life that managerialism now aims to exploit Each chapter explores how this is achieved and highlights the worker resistance that is provoked as a result The book concludes by demonstrating how the discourse of freedom underlying the managerial version of authenticity harbours potential for a radical transformation of the contemporary corporate form

Making the Law Explicit Matthias Klatt, 2008-09-08 Legal argumentation consists in the interpretation of texts Therefore it has a natural connection to the philosophy of language Central issues of this connection however lack a clear answer For instance how much freedom do judges have in applying the law How are the literal and the purposive approaches related to one another How can we distinguish between applying the law and making the law This book provides answers by means of a complex and detailed theory of literal meaning A new legal method is introduced namely the further development of the law It is so far unknown in Anglo American jurisprudence but it is shown that this new method helps in solving some of the most crucial puzzles in jurisprudence At its centre the book addresses legal indeterminism and refutes linguistic philosophical reasons for indeterminacy It spells out the normative character of interpretation as emphasized by Raz and with the help of Robert Brandom s normative pragmatics it is shown that the relativism of interpretation from a normative perspective does not at all justify scepticism On the contrary it supports the claim that legal argumentation can be objective and maintains that statements on the meaning of a statute can be right or wrong and take on inter subjective validity accordingly This book

breaks new ground in transferring Brandom's philosophy to legal theoretical problems and presents an original and exciting analysis of the semantic argument in legal argumentation. It was the recipient of the European Award for Legal Theory in 2002. This book represents on the one hand a reception of Robert Brandom's important theory including applications of this theory in the field of legal philosophy and on the other an exploration of the limits of an appeal in legal interpretation to the text. The enquiry thereby impinges upon the central juridico philosophical themes of meaning, objectivity and normativity. The author's work counts as a significant contribution to analytical jurisprudence and is deserving of a wide readership.

Robert Alexy, Professor for Public Law and Legal Philosophy, Kiel.

Klatt focuses on a very profound theory of concept formation and uses this theory in a creative way to solve classical problems of legal argumentation.
