Track and Its Long Term Behaviour Konstantinos Tzanakakis, 2013-01-26 A proper quality of a track and other infrastructure objects represents a basic requirement for train safety and punctuality Most of the physical systems and their components deteriorate over time This affects performance and may lead to failures Albert Einstein said You have to learn the rules of the game And then you have to play better than anyone else Only if we understand how the whole system works taking into account its imperfections and how they influence its quality and performance will we be able to learn the rules of the game and play better The book provides the readers with the necessary functional knowledge of track behaviour and comprehensively covers the function of the various track components their interaction as elements of the track system as well as the interaction of the track with railway vehicles By presenting important tools for a deep understanding of track

behaviour this book aims to be a reference guide for infrastructure managers and to help them to find ways improving track quality for optimum long term behaviour Air Transport and Operations Lori Fischer,David Pérez,Kurt Klein,Jacco Hoekstra,P. Tourism as a Challenge Maria F. Schmitz, P. Diaz (Anthropologist), 2013 The first tourist destinations were primarily consolidated in the early twentieth century Since then tourism has undergone significant changes in its economic and social components Over time many of these destinations have now come to represent mass tourism and are the subject of many studies on the impacts of tourism and competitiveness policies The conclusions of these studies point to the need for new perspectives and strategies ranging from adaptation to new contexts to a radical change in targets Concepts such as sustainability nature biodiversity or climate change have now been added to the tourism industry with varying degrees of knowledge and skill These offer a great opportunity to improve a model of tourism previously oriented towards business and the institutional rhetoric of sustainability a fact now recognised by tourists as representing the negative effects of conventional tourism Management of these innovations should include among its aims environmental education and orient visitors towards awareness and respect for sustainability even outside their leisure time To this end the tourist needs to be made aware of all those involved and their commitment to managing the destination as enjoying the territory should be based upon minimising the socio ecological impacts of tourism and on motivating nature conservation and participation of local populations in both these goals as well as in the economic benefits obtained The challenge entails the destination finding a good balance between economic and cultural benefits landscape conservation and tourist satisfaction This fifth volume of the Tourism Today Series presents a collection of papers addressing the how to manage these types of uses at a variety of destinations and in multiple contextual realities These edited papers were selected from those presented at different international conferences organised by the Wessex Institute of Technology They address important issues related to tourism as a tool for development which will give a better understanding of some of the current challenges

Servitization in Industry Gunter Lay,2014-06-13 This book summarizes the interim result of the servitization activities in manufacturing industries While the early literature on servitization tended to stress only its advantages more recently scholars have also started to refer to the challenges associated with servitization This book attempts to give a balanced picture of servitization The book is structured in four parts Part I introduces the topic by presenting the most recent academic discussion about servitization and uses an empirical analysis to show the degree of servitization across Europe The results of this analysis are then compared to the discussion in the literature This comparison highlights the existing discrepancies between the rather euphoric literature and the more skeptical practical experience The second and third parts attempt to explain these discrepancies by taking as a starting point the assumption that servitization recommendations have to consider the heterogeneity of the manufacturing sector and the capabilities of the provider Part II presents articles which analyze the specific characteristics of different sectors with their barriers and potentials and presents frameworks for a successful servitization of the core sectors in European manufacturing industries which include e g aeronautics automotive ICT chemical industries pulp and paper industries and different engineering sectors Part III focuses on companies capabilities which are necessary for successful servitization These include strategic management marketing organization innovation engineering human resources controlling quality and networks All the contributions in parts II and III add up to a detailed picture of servitization for sectors and functions and indicate the practical implications for enterprises in manufacturing industries The fourth part concludes the book with a chapter summarizing the findings and giving an outlook of servitization in manufacturing industries its challenges and future developments
