The Oxford Handbook of Group and Organizational Learning Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not In groups learning can occur at the level of the individual member and or the group as a whole In organizations learning can occur at both of these levels as well as that of the wider collective Besides varying in the amount and kind of information they acquire groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units In general groups and organizations that are proficient in acquiring retaining and transferring knowledge are more productive and more enduring than their less able counterparts The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by

leading scholars from several disciplines Because many of the same processes influence learning in groups and organizations including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity

Krasner,1999 New insights into the interplay between conflict and cooperation the impact of domestic political structures on foreign policy the role of institutions and the influence of worldviews and causal beliefs on decision making National Security Decisionmaking Yehuda Ben Meir,2019-04-02 The study of national security decisionmaking is fraught with pitfalls This statement holds true for any researcher but all the more so for someone like this author who has been actively engaged for many years in national security decisionmaking at times at the highest levels From the outset I have been aware of the dangers of subjectivism of injecting my own political attitudes and opinions preconceived notions and biases into the material the analyses and especially the conclusions and recommendations I have endeavored to the best of my ability to undertake this research with the disinterested curiosity and objective neutrality which should be the hallmark of a good scientist and researcher But no one can be totally disinterested in a process which has a direct bearing on his life and well being thus the only guarantee of the objectivity of such a work is the constant recognition and awareness of the danger of going astray the advice and criticism of one s colleagues and in the final analysis one s own conscience

Learning from Error in Policing

Jon Shane,2013-04-16 While the proximate cause of any accident is usually someone s immediate action or omission failure to act there is often a trail of underlying latent conditions that facilitated their error the person has in effect been unwittingly set up for failure by the organization This Brief explores an accident in policing as a framework for examining existing police practices Learning from Error in Policing describes a case of wrongful arrest from the perspective of organizational accident theory which suggests a single unsafe act in this case a wrongful arrest is facilitated by several underlying latent conditions

that triggered the event and failed to stop the harm once in motion The analysis demonstrates that the risk of errors committed by omission failing to act were significantly more likely to occur than errors committed by acts of commission By examining this case policy implications and directions for future research are discussed The analysis of this case and the underlying lessons learned from it will have important implications for researchers and practitioners in the policing field

Engaged Decision Making Étienne A. J. A. Rouwette, L. Alberto Franco, 2024-04-11 In the knowledge economy teams play a central role in decisions made within and across organisations The reason why teams with diverse compositions are often used is arguably their ability to develop solutions that none of their members could have produced alone Systems design strategy and policy development risk management and innovation are just a few of the areas that call for team decisions Unfortunately a considerable number of behavioural research studies show that teamwork is fraught with difficulties Teams often underestimate their fallibility struggle with conflict or are unable to share and integrate critical information effectively Indeed the evidence shows that two out of three teams do not achieve their goals and half of organisational decisions many of which are team decisions fail In this book the authors draw from research in psychology decision and systems sciences as well as their own research and consulting work that spans more than 20 years to show how designed interventions can enable team decision making to become rigorous transparent and defensible They cover theory and practice regarding the design delivery and evaluation of interventions to support team decision making in situations of varied complexity Written as an applied resource for researchers and advanced students in particular this book offers a guide to proven interventions that enhance the process of making team decisions and increase the chances of superior team results The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Dark Sides of

Organizational Life H. Cenk Sözen,H. Nejat Basım,2023-04-28 Exploring the darkest side of organizations may have a potential to change our previous assumptions about business life Scholars both in management and organizational research fields have shown interest in the bright side of behavioral life and have looked for the ways to create a positive organizational climate and assumed a positive relation between happiness of employees and productivity These main assumptions of the Human Relations School have dominated the scientific inquiry on organizational behavior However the dark side of organizational life may have more explanatory power than the bright side Hostility jealousy envy rivalry gossip problematic personalities dislike revenge and social exclusion are the realities of business life A manager may devote most of their time to cope with conflicts deviant behaviors ambitious individuals gossips and dysfunctional rivalry among employees It is evident that negative events and interactions among employees cost more time and energy for a manager than the positive side of organizational life This edited collection specifically focuses on these issues and will be of interest to researchers academics and advanced students in the fields of management organizational studies and behavior sociology social psychology and human resource management

Theories of International Relations M. Sullivan,Jack Donnelly,Jacqui True,2001-05-10 This book is a synthetic historiography of present day international relations theory a critical analysis of the continuing diversity and complexity of enduring themes through a sustained focus on the analysis of the empirical evidence accumulated by social scientists Special attention is given to key historical changes in theoretical approaches over the past half century with full recognition of the contestation over state based theory and the changing fortunes of contemporary approaches The book suggests that viable theories must transcend current intellectual fashion and attempts to bring together theory and practice while demonstrating the difficulty of assessing competing theories It addresses multiple strands of thought and assumes that their development cannot be understood in isolation from each other
