In general, the book provides a view of contemporary problems in using technology combined with an overview of similar issues in a historical context.

In addition to pointing out the factors of the negative impact of technology, the work includes information about philosophical issues, including identity and people's ability to communicate. In this aspect, it is significant that Powers mentions in the book several philosophers whose thought reflects the view of technology in different historical periods. The ideas of these philosophers are presented in Part 2 of the book and include the ideas of Plato, Seneca, Johannes Gutenberg, William Shakespeare, Benjamin Franklin, Henry Thoreau, and Marshall McLuhan. The work, therefore, utilizes the ideas of philosophers from various eras regarding the impact of modern technology, which provides a historical background to Powers' book. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st century skills but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides a theoretical framework through which to categorise and prioritise digital literacies. Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills. A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice. A consideration of exactly how to integrate digital literacies into the English language syllabus. Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks) and how to access teacher development opportunities online. This book is ideal for English language teachers and learners of all age groups and levels, academics and students researching digital literacies and anyone looking to expand their understanding of digital literacies within a teaching framework. **Slow Media** Jennifer

Rauch, 2018-09-11 Today we recognize that we have a different relationship to media technology and to information more broadly than we had even five years ago. We are connected to the news, media, to our jobs and to each other 24 hours a day. But many people have found their mediated lives to be too fast, too digital, too disposable and too distracted. This group, which includes many technologists and young people, believes that current practices of digital media production and consumption are unsustainable and works to promote alternate ways of living. Until recently, sustainable media practices have been mostly overlooked or thought of as a counterculture. But as Jennifer Rauch argues in this book, the concept of sustainable media has taken hold and continues to gain momentum. Slow media is not merely a lifestyle choice, she argues, but has potentially great implications for our communities and for the natural world. In eight chapters, Rauch offers a model of sustainable media that is slow, green and mindful. She examines the principles of the Slow Food movement: humanism, localism, simplicity, self-reliance and fairness, and applies them to the use and production of media. Challenging the perception that digital media is necessarily eco-friendly, she examines green media, which offers an alternative to a current commodities system that produces electronic waste and promotes consumption of nonrenewable resources. Lastly, she draws attention to mindfulness in media practice: mindful emailing or contemplative computing, for example, arguing that media has significant impacts on human health and psychological wellbeing. Slow Media will ultimately help readers understand the complex and surprising relationships between everyday media choices, human wellbeing and the natural world. It has the potential to transform the way we produce and use media by nurturing a media ecosystem that is more satisfying for people and more sustainable for the planet.
