McCaffrey, Kevin Duff, Holly James Westervelt, 2013-11-11

The impetus for this volume began with our research in the 1980 s involving serial neuropsychological evaluation with various patient populations At that time reports on the practice effects associated with routinely utilized clinical neuropsychological instruments were sparse While test retest data were available for almost all assessment instruments this was usually in the form of correlation coefficients and not changes in mean performance between or across assessment periods see McCaffrey Westervelt 1995 for a detailed discussion of these and related issues Clinical neuropsychological practitioners had few guidelines to assist them in determining if a change in a patient s performance across assessments was due to an intervention maturation practice effects or a combination of factors This volume represents our efforts at reviewing the literature between 1970 and 1998 and extracting the reported information on practice effects The tables include the

assessment instrument used information on the subject patient groups the sample size n gender age intervention interval between the assessments scores at both assessment points and the citation Those studies that reported data on more than two assessment points are indicated by a notation however any data beyond the second assessment are not reported and the interested reader should refer to the original article The tables are arranged alphabetically for the most widely used assessment instruments Those instruments for which there was limited data on practice effects are grouped by domain e g

Incagnoli, 2013-06-29 This volume reflects in part an update of Clinical Application of Neuropsychological Test Batteries edited by Theresa Incagnoli Gerald Goldstein and Charles Golden some 10 years ago While the initial concept of the present editors involved doing a straightforward update of each chapter it soon became apparent that the field of clinical neuropsychology had changed so dramatically and rapidly that substantial changes in the outline had to be made It was our view that sufficient interest remained in the standard comprehensive neuropsychological test batteries to make an update worthwhile We asked four senior people to take on this assignment James Moses Jr and Arnold Purisch in the case of the Luria Nebraska Battery and James Reed and Homer Reed for the Halstead Reitan Battery These individuals all have long term associations with these procedures and can be viewed as pioneers in their development However it also seemed to us that there was an increasing interest in the psychometric aspects of the standard procedures and in assessment issues related to the relative merits of using standard or individualized assessment strategies Thus we have chapters by Elbert Russell and Gerald Goldstein that provide discussions of these

current methodological and clinical issues During the past 10 years the cognitive revolution has made a strong impact on neuropsychology The interest of cognitive psychologists in brain function has increased dramatically and we now have an active field of cognitive neuropsychology something that was only beginning 10 years ago

**Ethical Decision Making in Clinical Neuropsychology** Shane S. Bush, 2007-07-17 This is an up to date guide to ethical decision making in the daily practice of clinical neuropsychology that includes a Continuing Education CE component administered by the American Academy of Clinical Neuropsychology Emphasizing positive ethics the book models a decision making process by which practitioners can successfully resolve common ethical challenges It is organized around the Ethical Standards of the American Psychological Association each of which is systematically applied to neuropsychology and brought to life through extensive case studies that show the ethical decision making model in action The book contains a total of 27 cases The book reflects the most recent published ethical professional and legal requirements and guidelines and synthesizes the latest research Graduate students those preparing for board certification and even experienced clinical neuropsychologists will find much here that is useful it will be especially valuable neuropsychologists who do forensic work Those who wish to earn CE credit after reading the book are directed to a test on the American Academy of Clinical Neuropsychology website [A Compendium of Neuropsychological Tests](#) Esther Strauss, Elisabeth M. S. Sherman, Otfried Spreen, 2006 This compendium gives an overview of the essential aspects of neuropsychological assessment practice It is also a source of critical reviews of major neuropsychological assessment tools for the use of the practicing clinician

*Neuropsychological Practice with Veterans* Shane S. Bush, 2012-05-07 In *Neuropsychological Practice with Veterans* Bush endeavors to compile a comprehensive account of how neuropsychological research assessment and treatment of veterans are impacted by military status He succeeds brilliantly with this undertaking This is an essential text for those working with active duty service members and veterans and is highly recommended to all those seeking new perspectives Journal of the International Neuropsychological Society In *Neuropsychological Practice with Veterans* Dr Shane S Bush provides a multifaceted overview of neuropsychological assessments and treatments associated with war veterans who have suffered from traumatic brain injury TBI during their service Somatic Psychotherapy Today Traumatic brain injury TBI afflicting approximately one third of injured veterans returning from duty in Iraq and Afghanistan is considered the signature injury in these conflicts In addition to TBI symptoms of posttraumatic stress disorder PTSD and major depression often afflict these veterans and contribute to neurological symptoms This is the first volume to provide a comprehensive overview of neuropsychologically grounded assessment treatment training and trends for clinicians who work with this population Encompassing the writings of clinicians and researchers experienced in working with the Veterans Administration VA population the book is grounded in an understanding of the unique culture of the veteran with its specialized service delivery methods and procedures In addition to its focus on veterans with TBI the text also addresses the assessment and treatment of aging veterans of previous

military conflicts and of combat and non combat veterans with neurological and emotional problems related to aging substance abuse HIV hepatitis psychiatric disorders and other problems Key Features Addresses the growing need for neuropsychological assessment and treatment of returning veterans as well as aging veterans of earlier conflicts Focuses on traumatic brain injury posttraumatic stress disorder and major depression Discusses assessment of malingering faking benefits pension return to work evaluations polytrauma management and training concerns Written by clinicians and researchers experienced in working with veterans Edited by a neuropsychology specialist who is well known in the VA community

Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury Gerald Young, 2014-02-11 This book is a comprehensive analysis of the definitions concepts and recent research on malingering feigning and other response biases in psychological injury forensic disability populations It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In *Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury* Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young's immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist

**Handbook of Neuropsychology and Aging** Paul David Nussbaum, 2013-11-11 Leaders in neuropsychology behavioral neurology speech and language science neuropsychiatry and many other disciplines contribute to this volume the first comprehensive review of knowledge in the field They discuss a wide range of disorders including areas of recent research such as frontal lobe dementias and the neuropsychological aspects of late life depression and clinical problems typically given insufficient consideration in other works such as seizure disorder head injury and mental retardation Normal aging is also covered in detail and assessment procedures and clinical interventions are given thorough treatment Other highlights include discussions of guardianship and caregiving personality and behavior psychotic disorders Alzheimer's and head trauma

*Ziskin's Coping with Psychiatric and Psychological Testimony* David Faust, 2012-01-12 This highly effective guide is designed to help attorneys differentiate expert testimony that is scientifically well established from authoritative pronouncements that are mainly speculative Building on the foundation of Jay Ziskin's classic work this updated text blends

the best of previous editions with discussion of positive scientific advances in the field to provide practical guidance for experts and lawyers alike Major contributors in the field summarize the state of the literature in numerous key areas of the behavioral sciences and law Working from these foundations the text provides extensive guidance tips and strategies for improving the quality of legal evaluations and testimony appraising the trustworthiness of experts opinions and as follows bolstering or challenging conclusions in a compelling manner Distinctive features of this text include detailed coverage of admissibility and Daubert challenges with unique chapters written by an eminently qualified judge and attorney hundreds of helpful suggestions covering such topics as forensic evaluations discovery and the conduct of depositions and cross examinations and two chapters on the use of visuals to enhance communication and persuasiveness including a unique chapter with over 125 model visuals for cases in psychology and law More than ever the sixth edition is an invaluable teaching tool and resource making it a must have for mental health professionals and attorneys

**Clinical Guide to Mental Disability Evaluations** Liza Gold, Donna L. Vanderpool, 2013-01-11 Disability evaluations are the most common clinical mental health evaluations conducted for nontreatment purposes They place mental health professionals in the role of communicating information that is typically confidential to administrative and legal systems Unfortunately mental health professionals receive little to no training in conducting assessments that focus on disability and disability management and often do not understand the implications and risks of providing this information especially without conducting what are often specialized evaluations Clinical Guide to Mental Health Disability Evaluations is geared for general mental health practitioners providing them with the basic information needed to competently provide the various types of disability evaluations It also provides enough information to inform forensic mental health providers in conducting more specialized evaluations
