Lógica aplicada : vaguedad e incertidumbre Ángel Laureano Garrido Bullón, 2014-12 **Heidegger y Derrida. Sobre la cuestión de la Ciencia y la Técnica.** Ángel Garrido, 2018-10-05 No es lo mismo el primerizo Heidegger con sus reminiscencias escolásticas y teológicas con el olor a n a hombre de pueblo provinciano de antiguo alumno del Seminario y pretendiente al ingreso en la Compañía de Jesús a quien solían confundir en Marburgo con el conserje que el profesor luego purgado por presunto lonazismo que escribía sobre otros temas que luego le preocuparon Entre ellos podemos considerar su famosa conferencia trabajo sobre La cuestión de la Técnica Die Frage nach der Technik pronunciada en la Academia Bavara de las Bellas Artes en la ciudad de Munich el año 1953 y que sería luego publicada pero eso ya en el año 1954 El análisis de dicha conferencia va a ser uno de los temas centrales de lo que aquí vamos a abordar basándonos para ello en la interpretación o hermenéutica de uno de sus más grandes continuadores defensores y comentaristas como fuera el filósofo francés judío de origen argelino Jacques Derrida 1930-2004 Este ilustre pensador ha brillado como tal vez ningún otro lo hizo en la constelación de los pensadores franceses del siglo XX como Michel Foucault Gilles Deleuze etc Pretendemos aclarar conceptos estudiar las trayectorias de su pensamiento y despejar lo más posible aquellos oscuros nubarrones que se han venido cerniendo sobre Martin Heidegger y sus hijos los cosas *Controversias del pensamiento. Homenaje al profesor Quintín Racionero* Escudero Pérez, Alejandro, Peretti Peñaranda, Cristina de, Rodríguez Marciel, Cristina, Yuste Leciñena, Piedad (eds.), 2016 Cuando Quintín Racionero concibió su proyecto de investigación El papel de las controversias en la producción de las prácticas teóricas y en el fortalecimiento de la sociedad civil el panorama económico social y político de algunos países de nuestro entorno no parecía tan desolador como ahora aunque ya se auguraba un futuro problemático e inquietante Tan solo han transcurrido unos pocos años y observamos con espanto cómo los estados se descomponen abrumados por conflictos que castigan a los sectores de la población más indefensos y vulnerables haciendo prevalecer ideologías autoritarias e intransigentes eliminando cualquier atisbo de tolerancia y respeto hacia conductas y maneras de pensar diferentes Una ola de ciegos frenes se va extendiendo por el planeta que reclama la consigna del silencio quien pueda ignorando el sufrimiento aplastando al débil fortaleciendo al poderoso Hoy más que nunca urge llevar a la práctica el proyecto de Quintín buscar áreas de consenso en las que dirimir los antagonismos racionalizar las polémicas y encontrar un modelo teórico a partir del cual solventar los enfrentamientos Quintín propuso su proyecto a varios investigadores con el propósito de que analizaran casos específicos de controversias Este libro es el resultado de esos estudios y de mucho más pues recoge el homenaje la admiración y el cariño que todos sus colaboradores le profesamos Piedad Yuste Proyecto de investigación FFI2011-29623 *Neutrosophic Computing and Machine Learning, Vol. 22* Florentin Smarandache, Maikel Leyva-Vázquez, 2022-07-01 Neutrosophic Computing and Machine Learning NCML es una revista académica que ha sido creada para publicaciones de estudios avanzados en neutrosófica conjunto neutrosófico lógica neutrosófica probabilidad neutrosófica estadística neutrosófica enfoques neutrosóficos para el
