Rethinking Science Education Roland M. Schulz,2014-08-01 This book presents a philosophy of science education as a research field as well as its value for curriculum instruction and teacher pedagogy It seeks to re think science education as an educational endeavour by examining why past reform efforts have been only partially successful including why the fundamental goal of achieving scientific literacy after several reform waves has proven to be so elusive The identity of such a philosophy is first defined in relation to the fields of philosophy philosophy of science and philosophy of education It argues that educational theory can support teacher s pedagogical content knowledge and that history philosophy and sociology of science should inform and influence pedagogy Some case studies are provided which examine the nature of science and the nature of language to illustrate why and how a philosophy of science education contributes to science education reform It seeks to contribute in general to the improvement of curriculum design and science teacher education The perspective to be taken on board is that to teach science is to have a philosophical frame of mind about the subject about education about one s personal teacher identity **Light and Sound, Grades 6 - 12** Barbara R. progressive neoliberalism in areas including anti racist education teacher education STEM and assessment the volume uses qualitative empirical research and critical discourse analysis to identify emerging tools and strategies to disentangle the progressive aims of education from neoliberal agendas Offering a rarely nuanced treatment of the phenomenon of neoliberalism this text will benefit scholars academics and students in the fields of education policy and politics the sociology of education and the philosophy of education more broadly Those involved with the theory of education and multicultural education in general will also benefit from this volume
