Excerpt from *Home Life in Germany* Germans often maintain that their country is more diverse than any other and on that account more difficult to describe a country Of many races and various rules held loosely together by language and more tightly of late years by the bond Of empire But the truth probably is that in our country we see and understand varieties while in a foreign one we chiefly perceive what is unlike ourselves and common to the people we are Observing For from the flux and welter Of qualities that form a modern nation certain traits survive peculiar to that nation specialities Of feature character and habit some seen at first sight others only discovered after long and intimate acquaintance It is undoubtedly true that no one person can be at home in every corner Of the German Empire or of any other empire About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

1648-1914 Eda Sagarra,2017-07-12 This volume is a pioneering effort to examine the social demographic and economic changes that befell the Jewish communities of Central Europe after the dissolution of the Habsburg Empire It consists of studies researched and written especially for this volume by historians sociologists and economists all specialists in modern Central European Jewish affairs The era of national rivalry economic crises and political confusion between the two World Wars has been preceded by a pre World War I epoch of Jewish emancipation and assimilation During that period Jewish minorities had been harbored from violent anti Semitism by the Empire and they became torchbearers of industrialization and modernization This common destiny encouraged certain common characteristics in the three major components of the Empire Austria Hungary and the Czech territories despite the very different origins of the well over one million Jews in those three lands The disintegration of the Habsburg Empire created three small economically marginal national states inimical to each other and at liberty to create their own policies toward Jews in accord with the preferences of their respective ruling classes Active and openly discriminatory anti Semitic measures resulted in Austria and Hungary The only liberal heir country

of the Empire was Czechoslovakia although simmering anti-Semitism and below surface discrimination were widespread in Slovakia While one might have expected Jewish communities to return to their pre World War I tendencies to go their independent ways after the introduction of these policies social and economic patterns which had evolved in the Habsburg era persisted until the Anschluss in Austria German occupation in Czechoslovakia and World War II in Hungary Studies in this volume attest to continuing similarities among the three Jewish communities testifying to the depth of the Empire's long lasting impact on the behavior of Jews in Central Europe

Labour Laws for Women in Germany Alice Salomon, 1907

Imagineries of Domesticity and Women's Work in Germany Around 1800 Karin A. Wurst, 2023 Examines a variety of texts from late Enlightenment Germany to provide a nuanced rethinking of women's roles as wives mothers and housekeepers creators of the cultural spaces of the home Domesticity a set of practices emotions and values culminating in a

nourishing emotional and physical ambience the feel of being at home and belonging connects one's subjective experience to the material environment In late Enlightenment Germany writers from Joachim Heinrich Campe and Theodor von Hippel to Sophie La Roche imagined the home as a space where true humanity would be realized The high stakes cultural formation of domesticity was part of a complex discourse on the pursuit of happiness as a life well lived As domesticity became a surrogate for the lost religious certainties of the vanishing pre modern world an obsessive anxiety concerning its delineation in discourse suggested its importance but also its fragility and the consequences of its failure Karin A Wurst examines didactic novels by female authors autobiographical texts popular philosophy advice literature periodicals pedagogical tracts and household manuals in pursuit of a nuanced rethinking of the relationship between women's roles as wives mothers and housekeepers and as creators of the cultural spaces of the home She finds that the high value imaginary of domesticity encouraged women's agency insofar as they were tasked with turning theoretical ideals into everyday practice At the same time her book shows the under illuminated contribution of women's work to social and political change from within the patriarchal structures of eighteenth century Germany
