Schlesinger,2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author s 45 years of experience with and studying sexually motivated homicide Sexual murders are generally of two types catathymic and compulsive Catathymic homicides are caused by a breakthrough of underlying sexual conflicts They can be unplanned explosive acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim In compulsive homicides a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is sexually gratifying These murders also may be planned or unplanned In compulsive homicides that are unplanned the urge breaks through and disrupts the offender s controls when a victim of opportunity crosses his path The compulsive offender who plans his crimes often eludes law enforcement and as a result he can have

multiple serial victims over extended periods of time Both forms of sexual murder the catathymic and the compulsive are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis Recent advances in empirical research in sexual murder including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico has published many important studies These include such topics as necrophilia foreign object insertions in sexual homicide ritual and signature and temporal patterns in serial sexual homicide mass murder crime scene staging in homicide and undoing symbolic reversal at homicide scenes All such research will be included and incorporate into this fully updated Second Edition including approximately fifty new clinical case studies

Violence in the Barrios of Caracas Daniel S. Leon, 2019-07-02 This book presents an overview of the problem of urban violence in Caracas and specifically in its barrios It helps situate readers familiar or not with Latin American in the context that is Caracas Venezuela a city displaying one of the world's highest homicide rates The book offers a qualitative comparison of the informal mechanisms of social control in three barrios of Caracas This comprehensive analysis can help explain high homicide rates while socio economic conditions improved due to substantial oil windfalls in the twenty first century The author describes why informal social control was not effective in some barrios and points to the role of some organizational arrangements in increasing the incentives to use violence even under improving socio economic conditions The analysis addresses a gap in the literature on violence which mainly posits high violence rates after economic downturns Specifically it investigates social capital's moderating effect between Caracas political and economic structures and high violence rates This book concludes that perverse social capital found in the barrios of Caracas helps explain high violence rates while socio economic indicators improved until the early 2010s Students and researchers interested in security studies or Latin America will benefit from this book because of its extensive theoretical discussions use of primary sources and unique multidisciplinary analysis of urban violence

Mental Health Homicide and Society David P Horton, 2019-09-19 A homicide committed by a mentally disordered person who is under the care of health service professionals is a shocking event Otherwise known as a

patient homicide these incidents are followed by an investigation into the care and treatment received by the perpetrator. These investigations are often regarded as a way to learn lessons, establish accountability and provide catharsis to families and the public. The book argues, however, that patient homicide events and the circumstances in which they occur are communicated about within closed systems of life, e.g. law, medicine. These systems operate according to unique internal logics. The communications produced by these systems nevertheless resonate in society and enable a diverse and complex space of governance to emerge, a space of governance in which universal understandings about patient homicides, health care, public safety and risk are unachievable. The Scottish Government initiated reform of their patient homicide investigation procedures in 2017 and plans to reform patient homicide investigations in England are slowly germinating. This original and compelling book is therefore a timely and important contribution. It concludes that health policy makers should re-evaluate their normative commitments to patient homicide risk reduction in a world of disharmony, objection and resistance.
