Project 1 is a comprehensive study of the history and development of the modern world. It covers a wide range of topics, from the early civilizations of the ancient world to the modern era of globalization. The project is designed to provide a deep understanding of the complex forces that have shaped our world today.

The project is divided into several sections, each focusing on a different aspect of the world's history and development. The first section, 'The Ancient World', explores the origins of civilization and the early empires of the ancient world. The second section, 'The Middle Ages', examines the rise of the feudal system and the impact of the Crusades. The third section, 'The Renaissance', discusses the rebirth of art and science in Europe. The fourth section, 'The Enlightenment', explores the ideas of reason and progress that shaped the modern world. The fifth section, 'The Industrial Revolution', examines the impact of the steam engine and the rise of the factory system. The sixth section, 'The Modern World', discusses the impact of the world wars and the rise of the superpowers.

[Teaching Powerful Problem-Solving in Math](#) Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22. Teaching Powerful Problem Solving in Math provides the first in-depth portrait of schoolwide lesson study showing how U.S. teachers at several schools used it to implement powerful problem-based mathematics instruction. Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it, just as mathematicians would. By learning in this way, students discover the power of their own thinking and gain confidence that extends well beyond mathematics. This book introduces readers to urban elementary and K-8 schools where teachers have dramatically transformed math learning for teachers and for students. Readers will follow teachers as they transform instruction using schoolwide lesson study, building powerful new ways for educators to learn from each other and practice innovative teaching techniques. The authors use in-depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56%. Extensive resources and links are provided to help readers understand and build on the work of these schools, which is grounded in established principles of collective efficacy, intrinsic motivation, and learner agency for both students and teachers. Book Features: Shows how teaching through problem solving can erase the achievement gap in mathematics learning. Provides the first in-depth portrait of schoolwide lesson study showing how U.S. teachers at several schools build it and use it to transform teaching. Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards. Uses photographs, student work, and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school's work to build

problem solving Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons Includes lesson plans photographs of board work student journals school newsletters self assessment rubrics and dozens of links to the resources needed to begin using teaching through problem solving and school wide lesson study Provides long term teacher led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency
