MathGeAr investigate the current methodologies of mathematics education for technical and engineering disciplines. The projects aim to improve the existing mathematics curricula in Russian, Georgian, and Armenian universities by introducing modern technology enhanced learning (TEL) methods and tools, as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm. MetaMath and MathGeAr have brought together mathematics educators, TEL specialists, and experts in education quality assurance from 21 organizations across six countries. The results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the EU, Russia, Georgia, and Armenia have been conducted, have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countries. The book presents the methodology, procedure, and results of this analysis. This book is a valuable resource for teachers, especially those teaching mathematics and curriculum planners for engineers, as well as for a general audience interested in scientific and technical higher education.

*Chinese Teacher Compensation System of Compulsory Education* Jiang Jinqiu, 2021-11-29. This book examines the compensation system for teachers in compulsory education in China and how it can be brought to bear in attracting, retaining, and motivating teachers while improving the quality of basic education. The study first draws on theories of modern pay systems and revisits major teacher pay reforms at the national level and their implementation at the school level, thereby evaluating the characteristics and problems of pay systems. A comparative analysis of different pay scales and its competitiveness in contrast to other professions then further demonstrates the limitations of existing salary structures in compulsory education schools along with a failure to offer enough incentives for high quality teachers and teaching. Approaching the topic from both theoretical and empirical perspectives, the author proposes a restructured pay system and advances constructive suggestions on policymaking, as well as research directions in teacher pay reform. The book will appeal to scholars, students, school officials, and policymakers interested in education, economics, education management, and administration, and especially teacher pay scales and pay reforms.

Journey into Discrete Mathematics Owen D. Byer, Deirdre L. Smeltzer, Kenneth L. Wantz, 2018-11-13. *Journey into Discrete Mathematics* is designed for use in a first course in mathematical abstraction for early career undergraduate mathematics majors. The important ideas of discrete mathematics are included: logic, sets, proof, writing relations, counting, number theory, and graph theory in a manner that promotes development of a mathematical mindset and prepares students for further study. While the treatment is designed to prepare the student reader for the mathematics major, the book remains attractive and appealing to students of computer science and other problem solving disciplines. The exposition is exquisite and engaging and features detailed descriptions of the thought processes that one

might follow to attack the problems of mathematics The problems are appealing and vary widely in depth and difficulty Careful design of the book helps the student reader learn to think like a mathematician through the exposition and the problems provided Several of the core topics including counting number theory and graph theory are visited twice once in an introductory manner and then again in a later chapter with more advanced concepts and with a deeper perspective Owen D Byer and Deirdre L Smeltzer are both Professors of Mathematics at Eastern Mennonite University Kenneth L Wantz is Professor of Mathematics at Regent University Collectively the authors have specialized expertise and research publications ranging widely over discrete mathematics and have over fifty semesters of combined experience in teaching this subject
