*How to Read and Do Proofs* Daniel Solow, 2013-07-29 This text makes a great supplement and provides a systematic approach for teaching undergraduate and graduate students how to read understand think about and do proofs The approach is to categorize identify and explain at the student's level the various techniques that are used repeatedly in all proofs regardless of the subject in which the proofs arise How to Read and Do Proofs also explains when each technique is likely to be used based on certain key words that appear in the problem under consideration Doing so enables students to choose a technique consciously based on the form of the problem

*A Bridge to Higher Mathematics* Valentin Deaconu, 2016-12-19 A Bridge to Higher Mathematics is more than simply another book to aid the transition to advanced mathematics The authors intend to assist students in developing a deeper understanding of mathematics and mathematical thought The only way to understand mathematics is by doing mathematics The reader will learn the language of axioms and theorems and will write convincing and cogent proofs using quantifiers Students will solve many puzzles and encounter some mysteries and challenging problems The emphasis is on proof To progress towards mathematical maturity it is necessary to be trained in two aspects the ability to read and understand a proof and the ability to write a proof The journey begins with elements of logic and techniques of proof then with elementary set theory relations and functions Peano axioms for positive integers and for natural numbers follow in particular mathematical and other forms of induction Next is the construction of integers including some elementary number theory The notions of finite and infinite sets cardinality of counting techniques and combinatorics illustrate more techniques of proof For more advanced readers the text concludes with sets of rational numbers the set of reals and the set of complex numbers Topics like Zorn's lemma and the axiom of choice are included More challenging problems are marked with a star All these materials are optional depending on the instructor and the goals of the course
