Davis, 2006-11-30 From the Preface This book is addressed to all who are curious about the nature of mathematics and its role in society It is neither a text book nor a specialists book It consists of a number of loosely linked essays that may be read independently and for which I have tried to provide a leitmotif by throwing light on the relationship between mathematics and common sense In these essays I hope to foster a critical attitude towards both the existence of common sense in mathematics and the ambiguous role that it can play **Imagine Math 6** Michele Emmer, Marco

Abate, 2018-11-06 Imagine mathematics imagine with the help of mathematics imagine new worlds new geometries new forms Imagine building mathematical models that make it possible to manage our world better imagine combining music art poetry literature architecture and cinema with mathematics Imagine the unpredictable and sometimes counterintuitive applications of mathematics in all areas of human endeavour Imagination and mathematics imagination and culture culture and mathematics This sixth volume in the series begins with a homage to the architect Zaha Hadid who died on March 31st 2016 a few weeks before the opening of a large exhibition of her works in Palazzo Franchetti in Venice where all the Mathematics and Culture conferences have taken place in the last years A large section of the book is dedicated to literature

narrative and mathematics including a contribution from Simon Singh It discusses the role of media in mathematics including museums of science journals and movies Mathematics and applications including blood circulation and preventing crimes using earthquakes is also addressed while a section on mathematics and art examines the role of math in design A large selection presents photos of mathematicians and mathematical objects by Vincent Moncorge Discussing all topics in a way that is rigorous but captivating detailed but full of evocations it offers an all embracing look at the world of mathematics and culture

*Madness in Context: Historical, Poetic and Artistic Perspectives*, 2020-09-25 A group of twenty scholars from different disciplinary and cultural backgrounds developed a series of dialogues and discussions on the notion experience and representation of madness This volume is the result of those discussions

**Math Goes to the Movies** Burkard Polster, Marty Ross, 2012-08-31 Mel Gibson teaching Euclidean geometry Meg Ryan and Tim Robbins acting out Zeno's paradox Michael Jackson proving in three different ways that  $7 \times 13 = 28$  These are just a few of the intriguing mathematical snippets that occur in hundreds of movies Burkard Polster and Marty Ross pored through the cinematic calculus to create this thorough and entertaining survey of the quirky fun and beautiful mathematics to be found on the big screen Math Goes to the Movies is based on the authors own collection of more than 700 mathematical movies and their many years using movie clips to inject moments of fun into their courses With more than 200 illustrations many of them screenshots from the movies themselves this book provides an inviting way to explore math featuring such movies as Good Will Hunting A Beautiful Mind Stand and Deliver Pi Die Hard The Mirror Has Two Faces The authors use these iconic movies to introduce and explain important and famous mathematical ideas higher dimensions the golden ratio infinity and much more Not all math in movies makes sense however and Polster and Ross talk about Hollywood's most absurd blunders and outrageous mathematical scenes Interviews with mathematical consultants to movies round out this engaging journey into the realm of cinematic mathematics This fascinating behind the scenes look at movie math shows how fun and illuminating equations can be

*Mathland* Michele Emmer, 2004 The latest book in our successful series IT Revolution in Architecture provides a concise summary of how our perception of the space around us has radically changed in recent years We could even go as far as to say that we ourselves shape the space around us according to how our perceptions of the universe alter and develop and mathematics plays a pivotal role In this book the virtual protagonist of the journey through the concept of space is the square Michele Emmer born in 1945 is Professor of Mathematics at the University La Sapienza in Rome and has authored many books and films on the subject of mathematics and art and culture He was also responsible for exhibitions at the Venetian Biennale and the Cit des Sciences La Villette in Paris
