

5 Find out about inspections

At least ten days before work starts, the PCA must inform you about the inspections required and you must inform your builder. The builder will make arrangements with the PCA for inspections to be carried out as needed. The PCA may not be able to issue certificates for completed work if inspections are not undertaken.

6 Obtain an occupation certificate

Before you can occupy the building, you must apply for and obtain an occupation certificate from your PCA.

The PCA will inspect the completed building work to determine if it is suitable to occupy. If satisfied, they will issue an occupation certificate.

You can appeal to the Land and Environment Court if the council refuses to issue a final occupation certificate (or construction certificate), or if no decision is made after a certain period. You cannot appeal against the decision of an accredited certifier to refuse an application for a certificate.

If you believe your PCA is unreasonably delaying the release of your certificate or approval you should, in the first instance, discuss this with the PCA. If you are not satisfied after that, contact the Board for advice and assistance.

Not all accredited private certifiers can issue all of the above certificates or conduct mandatory inspections. Their authority to issue these certificates depends upon their level of accreditation. Before you engage a certifier, you should check their level of accreditation at www.bpb.nsw.gov.au.

Councils can issue all of the certificates mentioned above.

Understanding Green Building Guidelines: For Students and Young Professionals Traci Rose Rider, 2010-02-17 Summarizes the main issues and strategies of the forceful and fast paced green building movement. Many professions are increasingly producing tools to assist clients in breaking down and understanding the different elements that reside under the umbrella of the sustainability movement. For the design and construction professions this unpacking often takes the form of green building guidelines and rating systems. This book aims to look at a selection of both national and local green building rating systems and guidelines ranging from commercial to residential. While the goal is to provide students and young professionals with a solid overview of each product enabling them to understand the differences and select the most appropriate system for their chosen projects, the book provides valuable overviews and comparisons for anyone interested in better buildings: designers, homeowners, realtors, contractors, facility managers, site designers and more.

Design Professional's Guide to Zero Net Energy Buildings Charles Eley, 2016-11-15 In the Design Professional's Guide to Zero Net Energy Buildings Charles Eley draws from over 40 years of his own experience and interviews with other industry experts to lay out the principles for achieving zero net energy (ZNE) buildings which produce as much energy as they use over the course of a year. Eley emphasizes the importance of building energy use in achieving a sustainable future, describes how building energy use can be minimized through smart design and energy efficiency technologies, and presents practical information on how to incorporate renewable energy technologies to meet the lowered energy needs. The book shows the reader through examples and explanations that these solutions are viable and cost effective.
