Holt Environmental Science Karen Arms, 2008 Carbon and Its Domestication A.M. Mannion, 2006-01-12 Carbon is chemically versatile and is thus the body and soul of biological geological ecological and economic systems Its appropriation by humans through diversion of its biogeochemical cycle has been a mainstay of development This domestication is characterized by a number of thresholds control of fire development of agriculture expansion of Europe fossil fuel use and biotechnology All have exacted an environmental toll not least being climatic change and biodiversity loss Carbon management now and in the future is a hot political issue There is no existing book which focuses on the pivotal role of carbon in the environment and society and the ways in which carbon has been domesticated in time and space to generate wealth and political advantage Students of environmental science geography biology and general science will find this work invaluable as a cross disciplinary text **High Tech Trash** Elizabeth Grossman, 2006-05-06 The Digital Age was expected to usher in an era of clean production an alternative to smokestack industries and their pollutants But as environmental journalist Elizabeth Grossman reveals in this penetrating analysis of high tech manufacture and disposal digital may be sleek but it s anything but clean Deep within every electronic device lie toxic materials that make up the bits and bytes a complex thicket of lead mercury cadmium plastics and a host of other often harmful ingredients High Tech Trash is a wake up call to the importance of the e waste issue and the health hazards involved Americans alone own more than two billion pieces of high tech electronics and discard five to seven million tons each year As a result electronic waste already makes up more than two thirds of the heavy metals and 40 percent of the lead found in our landfills But the problem goes far beyond American shores most tragically to the cities in China and India where shiploads of discarded electronics arrive daily There they are recycled picked apart by hand exposing thousands of workers and community residents to toxics As Grossman notes This is a story in which we all play a part whether we know it or not If you sit at a desk in an office talk to friends on your cell phone watch television listen to music on headphones are a child in Guangdong or a native of the Arctic you are part of this story The answers lie in changing how we design manufacture and dispose of high tech electronics Europe has led the way in regulating materials used in electronic devices and in e waste recycling But in the United States many have yet to recognize the persistent human health and environmental effects of the toxics in high tech devices If Silent Spring brought national attention to the dangers of DDT and other pesticides High Tech Trash could do the same for a new generation of technology s products **Arsenic** Kevin Henke, 2009-04-06 This book presents an overview of the chemistry geology toxicology and environmental impacts of arsenic presenting information on relatively common arsenic minerals and their key properties In
