Jewitt, 2006 This book sets out a framework for rethinking the three key areas of schooling that are most affected by
technology s impact on education today knowledge as curriculum learning and pedagogy and literacy across the curriculum
Carey Jewitt shows how all three are reshaped by the multimodal resources and facilities of new technologies and points the
way to rethinking teaching and learning in this environment The author proceeds practically through an exhaustive analysis
of teaching and learning with technology mediated materials such as CD ROMs web sites the internet computer
programming applications and computer games She relates each in turn to the main curriculum topics of English
Mathematics and Science Through this detailed scrutiny the following questions emerge How do the new technologies
reshape knowledge as curriculum How does the use of new technologies in the classroom reshape learning and pedagogy As
writing moves from page to screen what is the impact on students situated literary practices and how does it affect learning
Through these questions this book demonstrates that mode technology and curriculum knowledge are fundamentally
connected and describes how teacher and student roles in the classroom could be altered in response to new technologies
