The Hen at Work Ernest Cobb, 2015-08-05 Excerpt from *The Hen at Work A Brief Manual of Home Poultry Culture* In every household no matter how economical the housewife there is a certain amount of table scraps and kitchen waste which has feeding value but which if not fed finds its way into the garbage pail Poultry is the only class of domestic animals which is suitable for converting this waste material right where it is produced in the city into wholesome and nutritious food in the form of eggs and poultry meat Each hen in her pullet year should produce ten dozen eggs The average size of the back yard flock should be at least ten hens Thus each flock would produce in a year 100 dozen of eggs which at the conservative value of 25 cents a dozen would be worth 25 00 About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses
