Reliability, Stress Analysis, and Failure Prevention Aspects of Adhesive and Bolted Joints, Rubber Components, Composite Springs Erol Sancaktar, 1998 Comprises 15 contributions from the 1998 International Mechanical Engineering Congress and Exposition Representative paper topics include performance prediction of elastomeric gasket materials by compression stress relaxation the damping characteristics of machine structures assembled by bonding stress analysis of bolted circular flanged joints with tap bolts and proper selection of auxiliary heat source for reducing thermal residual stresses during the welding process No subject index Annotation copyrighted by Book News Inc Portland OR

Основы комплексного контроля топографии поверхности деталей., МНГР , Polymer Surface Modification: Relevance to Adhesion Kash L. Mittal, 2007-05-11 This book documents the proceedings of the Fifth International Symposium on this topic held in Toronto The book is divided into two parts Part 1 Surface Modification Techniques Part 2 Adhesion Improvement to Polymer Surfaces Various ways to modify a host of polymer surfaces for a variety of purposes are covered in this book with emphasis on latest developments There is a tremendous current interest in devising new ways or ameliorating the existing techniques to modify polymer surfaces to attain desired characteristics because of its importance in a legion of technological areas and all signals indicate that this interest will continue unabated So this book should fill the need and should be a valuable addition to the literature Advanced Design and Manufacture to Gain a Competitive Edge Xiu-Tian Yan, Chengyu Jiang, Benoit Eynard, 2008-07-30 Manufacturing industry has been one of the key drivers for recent rapid global economic development Globalisation of manufacturing industries due to distributed design and labour advantage leads to a drive and thirst for technological advancements and expertise in the fields of advanced design and manufacturing This development results in many economical benefits to and improvement of quality of life for many people all over the world This rapid development also creates many opportunities and challenges for both industrialists and academics as the design requirements and constraints have completely changed in this global design and manufacture environment Consequently the way to design manufacture and realise products have changed as well More and more design and manufacture tasks can now be undertaken within computer environment using simulation and virtual reality technologies These technological advancements hence support more advanced product development and manufacturing operations in such a global design and manufacturing environment In this global context and scenario both industry and the academia have an urgent need to equip themselves with the latest knowledge technology and methods developed for engineering design and manufacture Thermal Spray 2001 Christopher C.
