Becoming a Better Teacher Giselle O. Martin-Kniep,2000-11-15 This book provides K 12 educators with key information about some of the most effective teaching and learning tools available today in one convenient publication Each of the innovations has a long history of use and has been researched and evaluated in a variety of settings Giselle Martin Kniep chose these specific innovations because as a whole they foster a student centered classroom environment that is both equitable and rigorous In separate chapters for each topic she addresses 1 essential questions 2 curriculum integration 3 standards based curriculum and assessment design 4 authentic assessment 5 scoring rubrics 6 portfolios 7 reflection and 8 action research Annotated lists of recommended resources provide suggestions for further exploration of each topic Readers new to these topics will gain a basic understanding of each and learn how to use them to create a student centered classroom More experienced educators can also benefit from reexamining these innovations and considering them as parts of a comprehensive whole Numerous examples from all grade levels along with design modules templates and checklists make this an invaluable guide for teachers and administrators Note This product listing is for the Adobe Acrobat PDF version of the book **State Education Journal Index and Educators' Guide to Periodicals Research Strategies** ,2005 An index of state education journals **Grading for Impact** Tom Hierck,Garth Larson,2018-04-04 Aim for a target based grading system and create stronger learning opportunities Do you wish there was more clarity when it comes to measuring student

progress and learning What if there was a way to utilize grading and assessment to focus on learning rather than performance and the process rather than the product As grading assessment and reporting continue to be relevant topics of discussion this book helps you create a functional plan to elevate and advance standards based grading practices Teachers and administrators will learn how to assess grade and report against specific learning targets rather than standards as a whole to make skill acquisition the highest priority Grounded in application to provide focus and clarity this book features Real case studies of schools that have incorporated target based assessment feedback grading and reporting Practical examples to guide implementation Questions checklists illustrations and audits of practice to showcase the work in action An accessible format and layout that support both immediate implementation and long term goals Despite being a topic that generates emotion and resistance to change target based assessment builds the foundation for a learner centered system that provides clear expectations and feedback for teachers students and parents Grading for Impact is a simple and straightforward guide to re thinking grading based on mastery of specific skills and concepts rather than broadly written standards Real world examples of teachers struggling with and answering the old questions are included How do we grade fairly and accurately and How do we use grades as an instructional strategy Joseph Staub High School Teacher Downtown Magnets High School CA Most stakeholders agree that report cards aren t enough to show what our students are learning in school but changing the traditional grading system is a task that requires careful planning and challenging discussions Grading for Impact shows educators how to start and plan the discussions that will result in genuine learning experiences for students Ernie Rambo Virtual Learning Community Coordinator Nevada National Board Professional Learning Institute

Visible Learning John Hattie,2008-11-19 This unique and ground breaking book is the result of 15 years research and synthesises over 800 meta analyses on the influences on achievement in school aged students It builds a story about the power of teachers feedback and a model of learning and understanding The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning Areas covered include the influence of the student home school curricula teacher and teaching strategies A model of teaching and learning is developed based on the notion of visible teaching and visible learning A major message is that what works best for students is similar to what works best for teachers an attention to setting challenging learning intentions being clear about what success means and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand Although the current evidence based fad has turned into a debate about test scores this book is about using evidence to build and defend a model of teaching and learning A major contribution is a fascinating benchmark dashboard for comparing many innovations in teaching and schools **School Library Journal** ,2008

Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas Chevalier, 2016-04-01

Executive function refers to the goal oriented regulation of one's own thoughts, actions, and emotions. Its importance is attested by its contribution to the development of other cognitive skills, e.g., theory of mind, social abilities, e.g., peer interactions, and academic achievement, e.g., mathematics, and by the consequences of deficits in executive function which are observed in a wide range of developmental disorders such as attention deficit hyperactivity disorder and autism. Over the last decade, there has been growing interest in the development of executive function, and an expanding body of research has shown that executive function develops rapidly during the preschool years, with adult level performance being achieved during adolescence or later. This recent work, together with experimental research showing the effects of interventions targeting executive function, has yielded important insights into the neurocognitive processes underlying executive function. Given the complexity of the construct of executive function, however, and the multiplicity of underlying processes, there are often inconsistencies in the way that executive function is defined and studied. This inconsistency has hampered communication among researchers from various fields. This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function. Researchers using various methods, including behavioral experiments, neuroimaging, eye tracking, computer simulation, observational methods, and questionnaires, are encouraged to contribute original empirical research. In addition to original empirical articles, theoretical reviews and opinion perspective articles on promising future directions are welcome. We hope that researchers from different areas, such as developmental psychology, educational psychology, experimental psychology, neuropsychology, neuroscience, psychiatry, computational science, etc., will be represented in the Research Topic.

Ripe for Change Jane S. Hirschi, 2017-11-14 *Ripe for Change: Garden Based Learning in Schools* takes a big picture view of the school garden movement and the state of garden based learning in public K-8 education. The book frames the garden movement for educators and shows how school gardens have the potential to be a significant resource for teaching and learning. In this inviting and accessible book, the author summarizes the current school gardening movement and the emerging field of garden based learning. Provides an overview of the origins, benefits, and barriers to school gardening. Explores sustainable models for garden based learning. Includes five case studies of successful partnerships between urban districts and nonprofit school gardening organizations around the country. Illustrates how gardens can be used for integrating academic lessons aligned with the Common Core State Standards and Next Generation Science Standards. Includes examples of important tools available for assessing the impact of school gardens. *Ripe for Change* reveals a wealth of resources to show how garden based learning is being implemented in a systematic way in public education and offers next steps to widen and deepen the practice to reach children in all schools.
