Guide 2014 Michael Haese, **Asian Research in Mathematics Education** Bill Atweh, Lianghuo Fan, Catherine P. Vistro-Yu, 2023-05-17 This book focuses on the development of research in mathematics education cultures and its products from the perspective of local educators It consists of contributions from Mainland China Indonesia Korea Macao Singapore the Philippines and Turkey This book examines the development of the culture of research in the respective countries and also reviews the research conducted in the recent past in mathematics education It takes a critical stance through identifying the various accomplishments and identifying challenges for the future of research in terms of its diversification and quality Divided into two sections the first section considers factors around the development of a research culture in the respective countries by focusing on the means used to develop research expertise and quality The second section consists of overviews of the area of research and methodologies conducted in mathematics education in the various countries with the intention of highlighting the research topics conducted as well as discussing omissions of such research **Intelligent Systems, Business, and Innovation Research** Rim El Khoury, Nohade Nasrallah, 2024-01-25 Intelligent systems research is a multidisciplinary field that focuses on the development of systems that can perceive reason and act autonomously This can include areas such as machine learning artificial intelligence natural language processing and robotics The goal of intelligent systems research is to develop systems that can understand learn from and adapt to their environment to perform tasks that would typically require human intelligence Business and innovation research is an interdisciplinary field that examines how organizations can create develop and implement new ideas products and services This can include areas such as organizational behaviour strategic management and marketing The goal of business and innovation research is to understand how organizations can foster an environment that encourages creativity and innovation and how they can develop and implement new ideas in a way that leads to success Intelligent Systems Business and Innovation Research is a research area that brings together these two fields to study the use of intelligent systems and technologies in the business context to drive innovation improve operational efficiency and effectiveness of the organization The book aims to understand how intelligent systems can be used in business applications how to design and implement them how to manage the associated challenges and how to leverage them to foster innovation create new business models and gain competitive advantage It offers guidance on how to navigate potential conflicts and challenges that may arise during multidisciplinary research in areas such as Industry 4 0 Internet of Things modern machine learning software agent applications and data science The book focuses on the various fields in which intelligent systems play a critical role in enabling the development of advanced technologies that can perform tasks that would typically require human intelligence For example in smart control systems intelligent

algorithms can be used to optimize the performance of machines and devices while in cyber security they can be used to protect networks and data from cyber attacks In bioinformatics intelligent systems can be used to analyse large amounts of biological data while in virtual reality and robotics they can be used to create realistic and responsive simulations and automats Additionally the book also highlights the rapidly advancing theoretical foundations of fuzzy sets mathematical logic and non classical logic These are important theoretical frameworks for the development of intelligent systems as they provide the foundation for the representation and manipulation of uncertainty complexity and imprecision These theoretical foundations are essential in the development of intelligent systems that can make decisions and perform tasks in uncertain complex and dynamic environments

Proceedings of the 6th International Conference on Current Issues in Education (ICCIE) 2023 Paramita Cahyaningrum Kuswandi,Ezi Apino,Syahri Ramadhan,Ririn Susetyaningsih,Siwi Widiastuti,2024-05-18 This is an open access book In this Industrial Era 4.0 society encounters significant environmental economic and social challenges Thus educational institutions need to ensure that all students are well prepared for the future and that they can act as agents of change As a result educational institution must expand their educational system extensively to address these challenges including reshaping teaching and learning notions and platforms that immensely focus on not only developing a broad set of academic staff and student s knowledge skills attitudes and values but also upholding the fast growing technology Building strong learning connections should be perceived as the highest priority in educational institutions The connection paves the way for critical thinking and it is a fundamental concept that connects both context and relevance In this digital information age technology has enormous potential to assist this whole process of connection The 5th International Conference of Current Issues in Education ICCIE 2023 provides platforms for researchers and practitioners to share their ideas and experiences concerning these issues The conference also brings an excellent opportunity to connect with global participants and enhance further collaborations
