Donald went to New Zealand for a holiday with his parents. At Taupo, there was an exciting prawn fishing center. His father and he bought the passes for NZD 25 each and went fishing for prawn. They decided to have a competition amongst themselves and noted their prawn catch hourly to see who caught more.

1. In the first hour, Donald caught 17 and his father caught 22. How many prawns did they catch in the first hour altogether?

2. In the second hour, Donald caught 23 and his father caught 12. How many prawns did they catch in the second hour altogether?

3. In the third hour, Donald caught 24 and his father caught 27. How many prawns did they catch in the third hour altogether?

4. In the fourth hour, Donald caught 20 and his father caught 20. How many prawns did they catch in the fourth hour altogether?

5. How many prawns did they catch each in four hours and how many prawns did they catch altogether?

Math First Grade Multi Step Word Problems:

Making Sense of Word Problems Eric de Corte, Brian Greer, Lieven Verschaffel, 2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems In Part One a wide range of examples documenting the strength of the phenomenon is reviewed Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre This theoretical shift is reflected in Part Two A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions about and strategies for doing word problems Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum **Mathematics Strategies**
