Lester,2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the

present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community

The Power of Expert Teaching Shane N. Phillipson,Sivanes

Phillipson,2020-12-23 Throughout the world the challenges facing modern education are formidable Although some of the challenges facing are unique to each educational jurisdiction there are also some important commonalities that transcend jurisdictions Irrespective of the nature of these challenges there is an increasing focus on teacher quality what it is and how to enhance it To date research tells us what expert teachers should be doing in their classrooms This approach is based on the idea that teaching expertise is nothing more than the accumulation of specific skills and knowledge and as teachers acquire these skills and knowledge most of our educational challenges can be overcome This book questions this idea by asking 37 teachers who are already recognised as experts to share their classroom secrets Importantly the teachers come from diverse cultural contexts including Australia Finland Hong Kong and the US and they share how they became expert teachers their expectations for every student when they enter their classroom how they view and encourage teacher parent partnerships and what skills and knowledge they consider important for expert teaching To our knowledge this is the first book that compares and contrasts the approaches taken by expert teachers from four very different cultural groups The book helps to demystify the work of the modern teacher what they do and the challenges they face If you aspire to be an expert teacher this book provides a clear model of how to approach the process If you are an education researcher searching for impact this book outlines what are some of the emerging hot topics in education research If you are involved in teacher education then this book offers some new approaches to initial teacher education If your focus is on educational policy this book helps make sense of the links between the classrooms of expert teachers education research and academic achievement Finally this book will help parents understand how best to partner with their child s teacher in order to enhance their learning

Methodology for Research with Early Childhood Education and Care Professionals Cecilia Wallerstedt,Eva Brooks,Elin Eriksen Ødegaard,Niklas Pramling,2022-11-28 This open access book addresses the growing trend in the field of early childhood education and care ECEC research named collaborative knowledge building in which researchers and ECEC personnel collaborate This kind of research encompasses a number of approaches such as design studies action studies Learning Studies Lesson Studies and combined research and development studies There are important differences between these approaches but they also share

some features which makes it possible to see them as examples of a particular tradition of knowledge building Collaborative knowledge building constitutes close ties between developing practices of early childhood education and care and generating empirically grounded theoretical knowledge This book contributes to the methodology of practices developing research by mapping this movement through exemplifying themes actualised in such studies and through conceptualizing important and recurring gains and challenges It also describes how the latter can be taken on

Internationalization of Teacher Education and the Nation State Rita Z. Nazeer-Ikeda, 2020-10-29 The relationship between teacher education and internationalization is often regarded as one that has just begun sparked by globalization and its knowledge economy This book questions such an assumption by arguing that although contemporary demands on teacher education have intensified the need for internationalization teacher education and internationalization have a deep and complex relationship which is context dependent and has developed differently over time This book urges its readers to question and rethink overly nationalistic approaches to teacher education It shows how the internationalization of teacher education could be used as a strategic tool to support sustainable educational development and meet labor market demands for twenty first century competencies It puts the spotlight on the imperatives for internationalizing teacher education and its present forms and considers this current phenomenon in the context of Singapore This nation state has a history of internationalization albeit with differing rationales dimensions and strategies Internationalization has been a key driver of the Singapore education system s sustained growth from its humble beginnings to its present state as one of the best performing education systems in the world This book will be of great interest to policy makers academics researchers and graduate students in the fields of international and comparative education teacher education and South East Asian studies
