References and Resources Index **New Digital Technology in Education** Wan Ng, 2015-04-25 This book addresses the issues confronting educators in the integration of digital technologies into their teaching and their students learning. Such issues include a skepticism of the added value of technology to educational learning outcomes, the perception of the requirement to keep up with the fast pace of technological innovation, a lack of knowledge of affordable educational digital tools, and a lack of understanding of pedagogical strategies to embrace digital technologies in their teaching. This book presents theoretical perspectives of learning and teaching today's digital students with technology and propose a pragmatic and sustainable framework for teachers' professional learning to embed digital technologies into their repertoire of teaching strategies in a systematic, coherent and comfortable manner so that technology integration becomes an almost effortless pedagogy in their day to day teaching. The materials in this book are comprised of original and innovative contributions including empirical data to existing scholarship in this field. Examples of pedagogical possibilities that are both new and currently practised across a range of teaching contexts are featured.

Public Policy and Higher Education Edward P. St. John, Nathan J. Daun-Barnett, Karen M.

Moronski-Chapman, 2018-05-04 Public Policy and Higher Education provides readers with new ways to analyze complex state policies and offers the tools to examine how policies affect students' access and success in college. Rather than arguing for a single approach, the authors examine how policymakers and higher education administrators can work to inform and influence change within systems of higher education using research-based evidence along with consideration of political and historical values and beliefs. Raising new questions and examining recent developments, this updated edition is an invaluable resource for graduate students, administrators, policymakers, and researchers who seek to learn more about the crucial contexts underlying policy decisions and college access. Special Features: Case Studies allow readers to examine strategies used by different types of colleges to improve access and retention. Reflective Exercises encourage readers to discuss state and campus context for policy decisions and to think about the strategies used in a state or institution. Approachable Explanations unpack complex public policies and financial strategies for readers who seek understanding of public policy in higher education. Research-Based Recommendations explore how policymakers, higher education administrators, and faculty

An Age of Accountability John L. Rury,2023-10-13

An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
