Mathematics And The Biblical Text:

Mathematics and the Biblical Text Judith Nusse, 2014-05-26 What does mathematics have to do with the Biblical text Isn't it everywhere Doesn't everyone regardless of religion culture or point of view see it the same way Actually mathematics is not just facts and figures it may surprise people to know it also includes a worldview a philosophy with implications for how to approach it and how to use it Not only so but mathematicians disagree about mathematical facts and processes some reject what others accept disputing even what constitutes mathematical proof and one mathematician proved we cannot know it all Yet so incredibly effective is mathematics in describing and explaining physical phenomena and even some of the most chaotic of human enterprises that the universe appears to have been designed by a pure mathematician Through most of history mathematics has been intimately tied to religious and philosophical beliefs Is that any less true today if it is approached secularly The mathematics in this book is mainly confined to high school level so it should not be too difficult to understand Included are applications and scriptures that help students learn mathematics Whether involved in education or using mathematics on a job or just interested in mathematics or philosophy each reader is offered something to ponder

The Mathematical Mind of F. M. Dostoevsky Michael Marsh-Soloway, 2024-11-19 The Mathematical Mind of F. M. Dostoevsky Imaginary Numbers Non Euclidean Geometry and Infinity reconstructs the curriculum and readings that F. M. Dostoevsky encountered during his studies and connects such sources to the mathematical references and themes in his published works Prior to becoming a man of letters Dostoevsky studied at the Main Engineering School in St Petersburg from 1838 to 1843 After he was arrested submitted to mock execution by firing squad and sentenced to penal servitude in Siberia for his involvement in the revolutionary Petrashevsky Circle in 1849 most of his books and journals from the period of his education were confiscated and destroyed by the Third Section of the Russian Secret Police Although most scholars discount the legacy of his engineering studies the literary aesthetics of his works communicate an acute awareness of mathematical principles and debates This book unearths subtexts in works by Dostoevsky communicating veins of mathematical thought that evolved throughout Classical Antiquity the Renaissance and the Scientific Revolution

theological questions focus the mind of the inquirer on the endlessly intelligible self revelation of God to which the Sacred Scripture bears witness Our own questions and the great questions of our times have a place as long as they are purged of the ideological outlooks that can suppress or obscure the questions that the sacra pagina itself presses upon us Among the essays gathered in Theology as an Ecclesial Discipline the first set directs the reader's attention precisely to questions that trace the distinctive features of the nature of theology itself What are the principles and scope of the field of theology as practiced by believers in an ecclesial context Are historical critical methods of exegesis compatible with a properly theological interpretation of the Scriptures How can theology have a place in the academy as an intellectual discipline if the Magisterium seems to limit the scope of its inquiries The second part considers a range of questions that preoccupy contemporary Protestant and Catholic theologians Can the names Father Son and Holy Spirit be replaced by more inclusive titles in doctrine and liturgy By placing humanity at the center of theological investigation is Christian humanism distinct from secular humanism How can we be guilty of a sin committed by our first ancestors Can the Christian vision of procreative human sexuality survive the cultural onslaught of the sexual revolution The questions in the third part of this book arise from Catholic dialogue with non Christian religions or with other Christian communities or with conceptions of a cosmos in ecological crisis Is there a future for Catholic theology of religions How can people who do not believe in Christ be saved Is the cosmos a safe environment for human beings or alternatively how can the cosmos be protected from human depredation Can the concept of church stretch far enough to encompass Christian communities that see themselves as strictly local and independent bodies
