Children 3-11 is a book for those contemplating a career in primary teaching those about to embark on initial teacher education and those who are simply interested in the business of teaching children aged three to 11 years. It provides an overview of the key aspects involved in becoming a primary teacher both in terms of new government initiatives e.g. the National Primary Strategy collaboration and networking and personalization but also in terms of what it is to be a trainee teacher in the rapidly evolving world of primary schooling. This Second Edition brings readers up to date with the many changes that have taken place in primary education in the last five years and the book now takes into account the many different ways of becoming a trainee teacher including open learning in school training and modular study. New material in this edition includes a look at CPD studies especially reflection, lifelong learning and mentoring, collaborative practice and further discussion on professional values and working with other adults in the classroom.

Understanding Mathematics in the Lower Primary Years Derek Haylock, Anne D Cockburn, 1997-04-28. This is a substantially revised and expanded edition of the authors' earlier book *Understanding Early Years Mathematics*. It is written for teachers and student teachers working with children 4-8. It aims to provide them with a clearer understanding of the mathematical material they deal with in the classroom. This revised edition includes new chapters on number patterns and calculations, data handling and the characteristic ways of thinking mathematically that are at the heart of using and applying mathematics. Each chapter includes a section of activities for use with children, annotated suggestions for further reading and a summary of key ideas.

Teaching 3-8 Mark O'Hara, 2004. Providing comprehensive coverage of the issues involved in the new government chapters on 3-8 teaching, this is a textbook for initial teacher training and for newly qualified teachers.
