Genesis Pro Features

Draw

The main handle section on your Genesis Pro bow is machined 6061 T6 aluminum. This material is engineered to provide the Genesis Pro with optimal balance while being both extremely durable and very lightweight.

Larger reinforced clearance area

An increased range of vertical adjustment accommodates many modern rest and arrow to maximize bow string performance. The Genesis Pro does not include a rest. Choose a rest that suits your needs and shooting style.

Outer Wheel

The outer wheel is located at the upper limb of the bow. The main function of the outer wheel is to transfer draw energy from the bow limbs back through the string to the arrow in a smooth and consistent way.

Drawings in the outer wheel are made of a very low friction synthetic material which reduces friction.

Limbs and Limb Bells

The limbs on your Genesis Pro bow are aluminum with a rest of the bow. They store the potential energy you put into the bow with the string is released. As the moment of release, the stored potential energy is transferred into string is motion, and the arrow is propelled toward the target.

The limb bells adjust the draw to the bow and are also used to adjust the draw length on your bow. Using a 1/4 inch wrench, the limb bells can be turned in a counter-clockwise direction to decrease the draw length of the bow to a minimum of 15 lbs. Turning the limb bells clockwise will increase the bow to its maximum of 35 lbs. One full turn equals approximately 1/4 lbs. of draw weight. The limb bells on each limb should always be turned the same number of turns when adjusting bow weight.

Genesis Pro Bowstring System

The Genesis Pro bow features single cam design. The advanced design cam allows the bow to maintain its let-off percentage throughout the draw cycle. The advanced cam acts on the cam cables and guides the bow string. When the bowstring is released, the cam creates a "hook effect," which results in a better arrow while increasing bow speed.

Draw Stop

Customizing the Genesis Pro to your draw length is easy!

The draw stop on the Genesis Pro is adjusted with an Allen wrench. Simply turn the draw stop counter-clockwise until it is completely removed. Draw it to the desired draw stop position. Tighten with security in place. Use the larger diameter draw stop to adjust to 12" (approx.) increments and the smaller diameter draw stop to adjust to 1" (approx.) increments.

Eye

The double mounting eye on your Genesis bow is specially designed to fit the contours of your hand, providing both comfort and consistency.

Bowstring

The main bowstring Genesis Pro bow with a high-strength, durable bowstring made from nylon of the air. The bowstring provides superior performance, ensuring that the maximum amount of the bow's stored energy is transferred to the arrow.

Power Cable and Cable Guard

The power cable is the second component of the bowstring assembly. It is anchored at the ends on the upper limb and wraps around the outer wheel on the bow limb. It is mounted on the lower limb.

The cable guard is the metal rod which supports the sliding cable eye and helps the cable supply off to one side and out of the light path of the arrow.

Hooking Point

You or your local pro shop must properly install a string rest to ensure proper arrow position on the string for dependable accuracy.

WARNING: Make certain the arrow rest are in proper length and adjust to your bow's draw weight and draw length. Use and follow your arrow manufacturer's recommendations.
