**High-Level Adaptation and Aftereffects** Rocco Palumbo, Stefania D'Ascenzo, Luca Tommasi, 2017-04-28 Aftereffects generally occur after a prolonged exposure adaptation to a first stimulus possessing one given property followed by presentation of a stimulus bearing a neutral value of that property The aftereffect consists in a change in appearance of the neutral stimulus following the adapter compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli Studying how adaptation occurs which stimulus properties are sensitive to it which timings are necessary whether individual differences modulate its occurrence has thus become an indirect way to probe the plasticity of sensory functions in the nervous system recently extending to more cognitive and representational aspects of neural coding In the last two decades indeed it has been demonstrated that aftereffects occur not only for low level properties of stimuli such as motion color or orientation but also for high level properties Many studies have proven that high level properties of the stimuli e g gender identity ethnicity or age of a face or a voice are sensitive to this phenomenon It has been shown for example that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter Furthermore recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli but they seem to run across the high level properties subjects are adapted to These evidences are supported by cross category adaptation studies which underlie how aftereffects occur even across stimuli that do not share physical features e g bodies and faces but that instead share common higher level properties such as gender Given the growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing *The Routledge Companion to Transmedia Studies* Matthew Freeman, Renira Rampazzo Gambarato, 2018-10-09 Around the globe people now engage with media content across multiple platforms following stories characters worlds brands and other information across a spectrum of media channels This transmedia phenomenon has led to the burgeoning of transmedia studies in media cultural studies and communication departments across the academy The Routledge Companion to Transmedia Studies is the definitive volume for scholars and students interested in comprehending all the various aspects of transmediality This collection which gathers together original articles by a global roster of contributors from a variety of disciplines sets out to contextualize problematize and scrutinize the current status and future directions of transmediality exploring the industries arts practices cultures and methodologies of studying convergent media across multiple platforms **What's Hot in Literacy** Evan Ortlieb, Stephanie Grote-Garcia, Jack Cassidy, Earl H. Cheek Jr, 2020-09-30 This book showcases hot topics in literacy providing teachers with

practices for literacy improvement The international scholars which comprise the author line up for this edited collection describe the evidence based research findings from their research in K 12 schools to demonstrate how literacy success is fostered across the globe **Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1916
