Kovac, 2019-06-07 The IoT is the next manifestation of the Internet The trend started by connecting computers to computers progressed to connecting people to people and is now moving to connect everything to everything The movement started like a race with a lot of fanfare excitement and cheering We re now into the work phase and we have to figure out how to make the dream come true The IoT will have many faces and involve many fields as it progresses It will involve technology design security legal policy business artificial intelligence design Big Data and forensics about any field that exists now This is the reason for this book There are books in each one of these fields but the focus was always an inch wide and a mile deep There s a need for a book that will introduce the IoT to non engineers and allow them to dream of the possibilities and explore the work venues in this area The book had to be a mile wide and a few inches deep The editors met this goal by engaging experts from a number of fields and asking them to come together to create an introductory IoT book Fundamentals of Internet of Things for Non Engineers Provides a comprehensive view of the current fundamentals and the anticipated future trends in the realm of Internet of Things from a practitioner s point of view Brings together a variety of voices with subject matter expertise in these diverse topical areas to provide leaders students and lay persons with a fresh worldview of the Internet of Things and the background to succeed in related technology decision making Enhances the reader s experience through a review of actual applications of Internet of Things end points and devices to solve business and civic problems along with notes on lessons learned Prepares readers to embrace the Internet of Things era and address complex business social operational educational and personal systems integration questions and opportunities **Security-Related Advanced**

Technologies in Critical Infrastructure Protection Tünde Anna Kovács, Zoltán Nyikes, Igor Fürstner, 2022-09-05 This book collects the latest research results on security related advanced technologies The chapters contain relevant and interesting topics from numerous research Data science and artificial intelligence research nowadays one of the most important topics for the industry and the security sectors The autonomy and counter autonomy research topic are also very interesting Autonomous cars have become a part of the common days but their safe and secure application is not assured The research results in this field want to support and assure safe and secure autonomous applications in our quotidian life Also the safe and secure robotics in the industries and the defence assure a high standard of living and the given research results in this area can use to increase it The researchers work on it and publish the results that can be interesting for the other researchers and the innovators but also the industrial part members The researchers work on it and publish the results that can be interesting for the other researchers and the innovators but also the industrial part members Communication is a part of our life but the communication systems mesh all around the world Communication is the basis of modern life because without it life stop One other interesting and very important research area is the material sciences Virtual life cannot exist

without hardware and materials The new technical applications require new materials that can suffice the mechanical and physical chemical properties demand Nowadays a common requirement of the materials the high strength and lightweight Researchers want to serve the industrial requests and innovate new composite materials or increase the properties of the material through a new technological process The authors publish the latest results of the security related research area including the newest innovations and technologies which rise the interest of the defence and the modern industries even the interest of other researchers The Essentials of Computer Organization and Architecture Linda Null,Julia Lobur,2006
