**Islamic Architecture** Robert Hillenbrand, 1994 This is the definitive survey of Islamic architecture Working from a social rather than a technical perspective Hillenbrand shows how the buildings fulfilled their intended functions within the community Lavishly illustrated *Dictionary of Islamic Architecture* Andrew Petersen, 2002-03-11 The Dictionary of Islamic Architecture provides the fullest range of artistic technical archaeological cultural and biographical data for the entire geographical and chronological spread of Islamic architecture from West Africa through the Middle East to Indonesia and from the seventh to the eighteenth centuries of the Common Era Over 500 entries are arranged alphabetically and fully cross referenced and indexed to permit easy access to the text and to link items of related interest Four main categories of subject matter are explored dynastic and regional overviews individual site descriptions biographical entries technical definitions Over 100 relevant plans sketch maps photographs and other illustrations complement and illuminate the entries and the needs of the reader requiring further information are met by individual entry bibliographies **Art and Architecture in the Islamic Tradition** Mohammed Hamdouni Alami, 2013-12-20 What is art in the sense of the Islamic tradition Mohammed Hamdouni Alami argues that Islamic art has historically been excluded from Western notions of art that the Western aesthetic tradition's preoccupation with the human body and the ban on the representation of the human body in Islam has meant that Islamic and Western art have been perceived as inherently at odds However the move away from this anthropomorphic aesthetic in Western art movements such as modern abstract and constructivist painting have presented the opportunity for new ways of viewing and evaluating Islamic art and architecture This book questions the very idea of art predicated on the anthropocentric bias of classical art and the corollary exclusion of Islamic art from the status of art It addresses a central question in post classical aesthetic theory in as much as the advent of modern abstract and constructivist painting have shown that art can be other than the representation of the human body that art is not neutral aesthetic contemplation but it is fraught with power and violence and that the presupposition of classical art was not a universal truth but the assumption of a specific cultural and historical set of practices and vocabularies Based on close readings of classical Islamic literature philosophy poetry medicine and theology along with contemporary Western art theory the author uncovers a specific Islamic theoretical vision of art and architecture based on poetic practice politics cosmology and desire In particular it traces the effects of decoration and architectural planning on the human soul as well as the centrality of the gaze in this poetic view in Arabic nazar while examining its surprising similarity to modern theories of the gaze Through this double gesture moving critically between two traditions the author brings Islamic thought and aesthetics back into the realm of visibility addressing the lack of recognition in comparison with other historical periods and traditions This is an important step toward a critical analysis of the contemporary debate around the revival of Islamic architectural identity a debate intricately embedded within opposing Islamic political and social projects throughout the world *Islamic Art and*

**Architecture of the World's Major Religions** Thomas Barrie, 2020-08-25 In *Architecture of the World's Major Religions: An Essay on Themes, Differences and Similarities* Thomas Barrie presents and explains religious architecture in ways that challenge predominant presumptions regarding its aesthetic, formal, spatial and scenographic elements Two positions frame its narrative religious architecture is an amalgam of aesthetic, social, political, cultural, economic and doctrinal elements and these elements are materialized in often very different ways in the world's principal religions Central to the work's theoretical approaches is the communicative and discursive agency of religious architecture and the multisensory and ritual spaces it provides to create and deliver content Subsequently mythical and scriptural foundations and symbols of ecclesiastical and political power are of equal interest to formal organizations of thresholds, paths, courts and centers and celestial and geometric alignments Moreover it is equally concerned with the aesthetic, visual and material cultures and the transcendent realms they were designed to evoke as it is with the kinesthetic, the dynamic and multisensory experience of place and the tangible experiences of the body's interactions with architecture
