Islamic Biomedical Ethics Principles And Application:

Islamic Biomedical Ethics Abdulaziz Sachedina, 2009-04-06 Biomedical ethics is a burgeoning academic field with complex and far reaching consequences Whereas in Western secular bioethics this subject falls within larger ethical theories and applications utilitarianism deontology teleology and the like Islamic biomedical ethics has yet to find its natural academic home in Islamic studies In this pioneering work Abdulaziz Sachedina a scholar with life long academic training in Islamic law relates classic Muslim religious values to the new ethical challenges that arise from medical research and practice He depends on Muslim legal theory but then looks deeper than juridical practice to search for the underlying reasons that determine the rightness or wrongness of a particular action Drawing on the work of diverse Muslim theologians he outlines a form of moral reasoning that can derive and produce decisions that underscore the spirit of the Shari'a These decisions he argues still leave room to revisit earlier decisions and formulate new ones which in turn need not be understood as absolute or final After laying out this methodology he applies it to a series of ethical questions surrounding the human life cycle from birth to death including such issues as abortion euthanasia and organ donation The implications of Sachedina's work are broad His writing is unique in that it aims at conversing with Jewish and Christian ethics moving beyond the Islamic fatwa literature to search for a common language of moral justification and legitimization among the followers of the Abrahamic traditions He argues that Islamic theological ethics be organically connected with the legal tradition of Islam to enable it to sit in dialogue with secular and scripture based bioethics in other faith communities A breakthrough in Islamic bioethical studies this volume is welcome and long overdue reading for anyone interested in facing the difficult questions posed by modern medicine not only to the Muslim faithful but to the ethically minded at large

Brinton, 2015-10-27 Preaching Islamic Renewal examines the life and work of Muhammad Mitwalli Sha rawi one of Egypt's most beloved and successful Islamic preachers His wildly popular TV program aired every Friday for years until his death in 1998 At the height of his career it was estimated that up to 30 million people tuned in to his show each week Yet despite his pervasive and continued influence in Egypt and the wider Muslim world Sha rawi was for a long time neglected by academics While much of the academic literature that focuses on Islam in modern Egypt repeats the claim that traditionally trained Muslim scholars suffered the loss of religious authority Sha rawi is instead an example of a well trained Sunni scholar who became a national media sensation As an advisor to the rulers of Egypt as well as the first Arab television preacher he was one of the most important and controversial religious figures in late twentieth century Egypt Thanks to the repurposing of his videos on television and on the Internet Sha rawi's performances are still regularly viewed Jacqueline Brinton uses Sha rawi and his work as a lens to

The Shari'a Ayn al-Jawad Sajoo, 2018-03-30 2019 Choice Outstanding Academic title I B Tauris in association with the Institute of Ismaili Studies Why is the term shari'a the mention of which conjures up images of a politicised religion in many parts of the world understood in the ways that it is today For Muslims and non Muslims alike much is read into this term often with scant regard for its historical cultural or theological underpinnings The politics of identity has a profound effect on contemporary life both secular and religious and this includes our understandings of the shari'a Yet at the core of this concept for Muslims is the quest for a moral compass by which to navigate a path through life Qur'an 45:18 informed deeply by revelation and its interpretation by the Prophet Muhammad as well as his closest Companions Built on this foundation is an ongoing human endeavour to grasp and lend expression to that teaching elaborately in law but no less so in devotional ethical and customary practices in diverse Shi'i and Sunni Muslim communities

including in the West Popular myths about the shari'a that it is divine law that it is contained in a single code recognised by all Muslims that it is about controlling behavior that it defines Islam are challenged in this volume by leading scholars with a view to illuminating how we arrived here and where we might be headed The claims of the modern state as the custodian of the shari'a are put into perspective alongside the vital role of a pluralist civil society From bioethics human development family law and finance to constitutional and human rights issues this fifth volume in the Muslim Heritage Series offers an accessible account of the ideals and realities of the shari'a As such it will appeal not only to specialists in the humanities and social sciences but also to the general reader with an interest in global affairs and informed citizenship

Religion and Ethics in the Neonatal Intensive Care Unit Ronald M. Green, George A. Between Islamic and Secular Law Arezoo Sang Bastian, 2024-01-31 When describing the legal systems and laws of today's Muslim majority states in the Middle Eastern and North African region two categories of laws are identified one derived from Islamic and one from non Islamic law Following this notion the literature finds that novel legal areas do not have any connection to Islamic law since they were not regulated by classical Islamic law In contrast the topic of organ transplantation is inherently connected to Islamic law because Islam considers itself to encompass all aspects of life This research based on the analysis of organ transplantation laws of the MENA states encourages to rethink that a strict dichotomy between Islamic and non Islamic laws does not exist Organ transplantation laws in MENA states generally follow an international legal standard while also complying with the sharia

Medicine and Shariah Aasim I. Padela, 2021-06-15 Medicine and Shariah brings together experts from various fields including clinicians Islamic studies experts and Muslim theologians to analyze the interaction of the doctors and jurists who are forging the field of Islamic bioethics Although much ink has been spilled in generating Islamic responses to bioethical questions and in analyzing fatwas Islamic bioethics still remains an emerging field How are Islamic bioethical norms to be generated Are Islamic bioethical writings to be considered as part of the broader academic discourse in bioethics What even is the scope of Islamic bioethics Taking up these and related questions the essays in Medicine and Shariah provide the groundwork for a more robust field The volume begins by furnishing concepts and terms needed to map out the discourse It concludes by offering a multidisciplinary model for ethical deliberation that accounts for the various disciplines needed to derive Islamic moral norms and to understand biomedical contexts In between these bookends contributors apply various analytic empirical and normative lenses to examine the interaction between biomedical knowledge represented by physicians and Islamic law represented by jurists in Islamic bioethical deliberation By providing a multidisciplinary model for generating Islamic

bioethics rulings Medicine and Shariah provides the critical foundations for an Islamic bioethics that better attends to specific biomedical contexts and also accurately reflects the moral vision of Islam The volume will be essential reading for bioethicists and scholars of Islam for those interested in the dialectics of tradition modernity science and religion and more broadly for scholarly and professional communities that work at the intersection of the Islamic tradition and contemporary healthcare Contributors Ebrahim Moosa Aasim I Padela Vardit Rispler Chaim Abul Fadl Mohsin Ebrahim Muhammed Volkan Yildiran Stodolsky Mohammed Amin Kholwadia Hooman Keshavarzi and Bilal Ali **Artificial Intelligence and Islam**
