The Art and Architecture of Islam 1250-1800 Sheila S. Blair, Jonathan M. Bloom, 1996-09-25 They discuss for example how the universal caliphs of the first six centuries gave way to regional rulers and how in this new world order Iranian forms techniques and motifs played a dominant role in the artistic life of most of the Muslim world the one exception was the Maghrib an area protected from the full brunt of the Mongol invasions where traditional models continued to inspire artists and patrons By the sixteenth century say the authors the eastern Mediterranean under the Ottomans and the area of northern India under the Mughals had become more powerful and the Iranian models of early Ottoman and Mughal art gradually gave way to distinct regional and imperial styles **Art and Architecture in the Islamic Tradition** Mohammed Hamdouni Alami, 2013-12-20 What is art in the sense of the Islamic tradition Mohammed Hamdouni Alami argues that Islamic art has historically been excluded from Western notions of art that the Western aesthetic tradition's preoccupation with the human body and the ban on the representation of the human body in Islam has meant that Islamic and Western art have been perceived as inherently at odds However the move away from this anthropomorphic aesthetic in Western art movements such as modern abstract and constructivist painting have presented the opportunity for new ways of viewing and evaluating Islamic art and architecture This book questions the very idea of art predicated on the anthropocentric bias of classical art and the corollary exclusion of Islamic art from the status of art It addresses a central question in post classical aesthetic theory in as much as the advent of modern abstract and constructivist painting have shown that art can be other than the representation of the human body that art is not neutral aesthetic contemplation but it is fraught with power and violence

and that the presupposition of classical art was not a universal truth but the assumption of a specific cultural and historical set of practices and vocabularies Based on close readings of classical Islamic literature philosophy poetry medicine and theology along with contemporary Western art theory the author uncovers a specific Islamic theoretical vision of art and architecture based on poetic practice politics cosmology and desire In particular it traces the effects of decoration and architectural planning on the human soul as well as the centrality of the gaze in this poetic view in Arabic nazar while examining its surprising similarity to modern theories of the gaze Through this double gesture moving critically between two traditions the author brings Islamic thought and aesthetics back into the realm of visibility addressing the lack of recognition in comparison with other historical periods and traditions This is an important step toward a critical analysis of the contemporary debate around the revival of Islamic architectural identity a debate intricately embedded within opposing Islamic political and social projects throughout the world Early Islamic Art and Architecture Jonathan M.

Bloom,2017-05-15 This volume deals with the formative period of Islamic art to c 950 and the different approaches to studying it Individual essays deal with architecture ceramics coins textiles and manuscripts as well as with such broad questions as the supposed prohibition of images and the relationships between sacred and secular art An introductory essay sets each work in context it is complemented by a bibliography for further reading **Art of the Islamic World**

Visual Culture in the Islamic World Mohammed Hamdouni Alami,2015-04-17 In tenth century Iraq a group of Arab intellectuals and scholars known as the Ikhwan al Safa began to make their intellectual mark on the society around them A mysterious organisation the identities of its members have never been clear But its contribution to the philosophy art and culture of the era and indeed subsequent ones is evident In the visual arts for example Hamdouni Alami argues that the

theory of human proportions which the Ikwan al Safa propounded something very similar to those of da Vinci helped shape the evolution of the philosophy of aesthetics art and architecture in the tenth and eleventh centuries CE in particular in Egypt under the Fatimid rulers By examining the arts of the Fatimids focusing on painting and architectural works such as the first Fatimid mosque in al Mahdiyya Tunisia Hamdouni Alami offers analysis of the debates surrounding the ethics of the appreciation of Islamic art and architecture from a vital time in medieval Middle Eastern history and shows their similarity with aesthetic debates of Italian Renaissance *Atlas of World Art* John Onians,2004 Combines a survey of world art with maps showing the associations and dissemination of culture across the globe **Islamic Art** Jonathan M.
