Forensic Archaeology W. J. Mike Groen, Nicholas Márquez-Grant, Rob Janaway, 2015-02-17 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context. However such a

definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer. This volume is unique in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries, intergovernmental organisations or NGOs. It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical, educational, legal and judicial backgrounds. The chapters in this volume will be an invaluable reference to forensic archaeologists, forensic anthropologists, humanitarian and human rights workers, forensic scientists, police officers, professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident. This volume promotes the development of forensic archaeology worldwide. In addition, it proposes an interpretative framework that is grounded in archaeological theory and methodology, integrating affiliated behavioural and forensic sciences.

Microbial Safety in Water Resources Pei-Ying Hong, Timothy R. Julian, Muhammad Raihan Jumat, 2019-02-19

As more countries become water scarce, alternative water sources like treated wastewaters will be used to meet the demands of the domestic agriculture and industrial sectors. However, the use of treated wastewater is only justified when it is without any detrimental impacts on public health, food safety and water quality. To minimize impacts, well-operated treatment plants are important barriers that reduce the amount of contaminants disseminated from wastewaters into the environment during reuse events. Continuous accurate and comprehensive monitoring of our water further safeguards the public against potential risks. This eBook looks into topics that close the knowledge gaps in these mentioned areas.
