Exponential Relationships

Characteristics of Exponential Relationships: An exponential relationship has a constant growth rate. This means that for every unit increase in the independent variable, the dependent variable is multiplied by a constant factor. This constant factor is called the growth factor. The growth factor is always greater than 0 and not equal to 1. Exponential relationships are always increasing or decreasing.

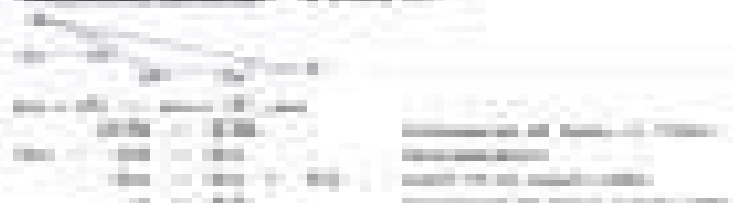

- If the growth factor is greater than 1, the relationship is increasing. (Ex: $y = 2^x$)
- If the growth factor is less than 1, the relationship is decreasing. (Ex: $y = (1/2)^x$)

Exponential Growth: $y = 2^x$

Exponential Decay: $y = (1/2)^x$

1. An exponential relationship is represented by a line.
2. An exponential relationship is represented by a curve.
