*Financial Markets in Vietnam's Transition Economy* Quan-Hoang Vuong, 2010-02-10 In 1986 Vietnam initiated its extensive economic reform program known as Doi Moi which saved the country then in a devastating economic crisis from a collapse. The introduction of market system has brought back substantial changes in both people's life and the national economy. Market mechanism, commercial institutions, private properties and capital goods ownership, free trade have since come into existence. Gradually financial markets have grown up to be a critically important component of Vietnam's economic transition. This book provides some in-depth introduction and analysis of Vietnam's financial markets with emphasis on corporate debts and equity, gold and foreign exchange. It may be regarded as one of the most important contributions to the literature of Vietnam's financial economics thus far. It contains original research results which should benefit readers with interest in understanding the contemporary issues of Vietnam's economy for either business or academic purposes. *Problems in China's Transitional Economy* Xiaobo Hu, 1998 1997 saw a major reform in China which signaled the move away from its traditional economy when Jiang Zemin called off the debate on public versus private ownership. However, none of the existing theories can fully explain the transformation of the property rights system during the post-Mao reforms. The first part of this volume will reconceptualize the property rights reform in post-Mao China to provide a political economy explanation of why the transformation of property rights in China appears piecemeal. The success of the post-Mao reforms can be attributed to China's ability to integrate the experience of a variety of transition models. The second part of the paper investigates two distinct transition models in light of the lessons from current Vietnamese reform. It explores the dynamics of political actions and analyzes the political reasons for economic reform.

Akbar, Rustam Jamilov, 2015-03-11 Neo transitional economics is a policy oriented collection of contemporary theoretical and empirical research studies on transition countries in the post crisis paradigm Topics covered range from monetary and financial economics to international trade and formation of a welfare state *Sustainable Livelihoods in Upland Vietnam* Elaine Morrison, 1998 **Decentralization in Asia and Latin America** Paul J. Smoke, Eduardo J. Gómez, George E. Peterson, 2006-11-28 Public sector decentralization has emerged prominently in many Asian and Latin American countries as a strategy to promote development and political reform Results in both cases have been mixed Despite broad similarities in intent and outcome contextual differences between the regions have led to striking differences in the way decentralization has been structured and implemented This volume takes an atypically historical and interdisciplinary perspective on decentralization highlighting how fiscal and political forces together have been shaping its evolution in the two regions **Labour Market and Industrial Relations in Vietnam** Ingrid Artus, Judith Holland, Uwe Blien, Van Phan thi Hong, 2016-10-20 The society and economy of Vietnam is still characterised by a rapid transformation process There is high economic and political pressure coming not only from internal developments but also from foreign countries This groundbreaking book takes stock of the rapid processes of change in the labour market and the industrial relations of Vietnam The contributions of Vietnamese and international experts cover the institutional arrangements of the labour market and of the system of industrial relations and they also look at consequences for welfare and social inequality and treat the relation between culture and the economy in the country Further contributions compare Vietnam with other developing country and analyse the relationships between international and Vietnamese labour markets They also address the key question as to whether Asia is a new focal point of industrial conflicts From Plan To Market Adam Fforde, 2019-03-13 This clear and accessible text explores Vietnam's successful transition from neo Stalinist central planning to a market economy Vietnamese style After describing the north Vietnamese system prior to 1975 and its colonial and precolonial antecedents the authors uncover the mechanisms of that changeover They contend that the Vietnamese transition was largely bottom up in character and that it evolved over a long enough period for the country's political economy to adjust This explains in part the rapid shift to a high growth externally oriented development path in the early

1990s despite the loss of Soviet aid and the lack of significant Western substitutes until 1992 1993 Based upon extensive incountry experience a wealth of primary materials and wide comparative knowledge of development issues the book challenges many preconceived notions both about Vietnam and about the general nature of transition processes
