A Layered Declarative Approach to Ontology Translation with Knowledge Preservation Oscar Corcho,2005 The ontology translation problem aka ontology interoperability problem appears when we decide to reuse an ontology or part of an ontology with a tool or language that is different from those ones in which the ontology is available If we force each ontology based system developer individually to commit to the task of translating and incorporating to their systems the ontologies that they need they will require a lot of effort and time to achieve their objective This book presents two contributions to the current state of the art on ontology translation among languages and or tools The first contribution is a proposal for a new model for building and maintaining ontology translation systems The second contribution characterises existing ontology translation approaches from the perspectives of semantic and pragmatic preservation that is consequence and intended meaning preservation respectively
