Appleton, D.J. Williams, 2012-12-06 The hardest data for managers and engineers in charge of the design and implementation of robot systems to acquire is also the most valuable case studies detailing best current practice and the return on investment actually achieved It has been a major goal of the British Robot Association among other professional groups to

organise meetings where such case studies are presented and discussed between members but the obvious restrictions of commercial confidentiality lead to considerable difficulty especially in relation to the best recent installations The authors of this book have been in the uniquely privileged position of lecturing in the Cambridge University Production Engineering Tripos a course specially organised in conjunction with a number of leading companies applying robots and automation Actual case studies from these companies form an important part of the course making this book that has emerged from it a uniquely important addition to our Open University Press series

Robotized technologies for enhanced shipyard operations: challenges and solutions Jawad Masood,Felix Vidal,David Castro,Afra M. Pertusa,Abel Feijoo,2024-03-25 Large component manufacturing relies heavily on manual operations and human workers Human centric solutions can preserve industry specific knowledge extend capabilities and improve job performance Three robotized technologies were developed for shipyard operations ABB and KUKA robot hand guiding systems HGS a lightweight collaborative system for plasma cutting and a cost effective 3D projection system for retrofitting These technologies were developed at the open didactic factory which served as platforms for rapid technological advancement The HGS was integrated with ABB and KUKA and the 3D projection technology and lightweight collaborative system offered a cost effective solution for small and medium shipyards However transitioning to non flat surfaces presents challenges due to geometric variations and discrepancies between the computer aided design model and the actual component
