

Dogs & Cats OF THE WORLD

What is the purpose of the study? The purpose of the study was to determine the effect of a 12-week, low-intensity, supervised exercise program on the physical and psychological health of older adults with chronic low back pain.

Why is this study important? This study is important because it provides evidence that a supervised exercise program can improve the physical and psychological health of older adults with chronic low back pain.

How was the study conducted? The study was conducted using a randomized controlled trial design. The participants were divided into two groups: a control group and an exercise group. The exercise group participated in a 12-week, low-intensity, supervised exercise program. The physical and psychological health of the participants was measured at baseline and at the end of the 12-week program.

What were the results of the study? The results of the study showed that the exercise group had significantly better physical and psychological health at the end of the 12-week program compared to the control group.

What are the conclusions of the study? The conclusions of the study are that a supervised exercise program can improve the physical and psychological health of older adults with chronic low back pain.
