Abstract: *Staphylococcus aureus* is a common cause of nosocomial infection. The purpose of this study was to determine the prevalence of *S. aureus* in the hospital environment and to identify risk factors for colonization. A total of 100 samples were collected from the hospital environment and analyzed by culture and sensitivity. The results showed that 60% of the samples were positive for *S. aureus*. The most common risk factors for colonization were contact with the hospital environment and colonization of the skin.
