Death and After-Life in the Theologies of Karl Barth and John Hick K.R. Schmitt, 2024-11-04 **Death and Afterlife in Modern France** Thomas A. Kselman, 2014-07-14 Although today in France church attendance is minimal when death occurs many families still cling to religious rites In exploring this common reaction to one of the most painful aspects of existence Thomas Kselman turns to nineteenth century French beliefs about death and the afterlife not only to show how deeply rooted the cult of the dead is in one Western society but how death and the behavior of mourners have been politicized in the modern world Drawing on sermons preached in rural and urban parishes folktales and accounts of seances the author vividly re creates the social and cultural context in which most French people responded to death and dealt with anxieties about the self and its survival Inspired mainly by Catholicism beliefs about death provided a social basis for moral order throughout the nineteenth century and were vulnerable to manipulation by public officials and clergy Kselman shows however that by mid century the increase in urbanization capitalism family privacy and expressed religious differences generated diverse attitudes toward death causing funerals to evolve from Catholic neighborhood rituals into personalized symbolic events for Catholics and dissenters alike the civil burial of Victor Hugo being perhaps the greatest symbol of rebellion Kselman s discussion of the growth of commercial funerals and innovations in cemetery administration illuminates a new struggle for control over funeral arrangements this time involving businessmen politicians families and clergy This struggle in turn demonstrates the importance of these events for defining social identity Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The A-Z of Death and Dying* Michael John Brennan, 2014-02-17 This engaging and informative resource provides readers with an understanding of the social cultural and historical influences that shape our encounters with death dying and bereavement a universal experience across humanity Written in an engaging and accessible style by leading international scholars and practitioners from within the field of death and bereavement studies this book will have broad appeal providing in a single volume insights from some of the key thinkers within the interdisciplinary field of death dying and bereavement Its approximately 200 entries will serve as useful starting points for those new to the topic and will be informative to those already acquainted with some of the core concepts and ideas within this burgeoning field of inquiry This encyclopedia will serve as an essential resource for high school and undergraduate students those engaged in independent research and professionals whose work involves caring for the dead dying and bereaved It will also be of great interest to general readers intrigued by the social medical and cultural dimensions to human mortality Underscored by the inescapable

biological certainties that affect us all The A Z of Death and Dying offers a highly relevant examination of the social and historical variation in the rituals practices and beliefs surrounding the end of life Reincarnation & Hyperlink Theory
CARLOS RUIZ POLEO,2013-03 A vision type dream on someone so far unknown to him and a series of personal experiences shatter the religious convictions of the author of this book as he struggles for more than twenty years to find a logical explanation for inter connected events and premonitory dreams In the search for his possible connection with the man in the dream an ex president of the USA he analyzed several theories and finally found one that suggest another world and the existence of one life or many others beyond this one Straining against all that he had previously believed he initially discounts the possibility of reincarnation but after countless discards and rejections he finally accepts it as being the only rational explanation to the doubts presented In a process of past life regression inexplicable new evidence and memories appear which are later corroborated However he blatantly refuses to accept these memories as being his own because there is no scientific approach to justify their existence in his mind as there had been no regular inputs or physical recording process in the brain which could account for their presence As a result of this a theory forms in the author s mind which he refers to as Hyperlink which could offer a rational explanation for the possible access to remote memories of past lives and opens in the process a window on a world without the limits of time or space one in which reincarnation links all
