

Sir Isaac Newton

Sir Isaac Newton was an important scientist who is well known for his discoveries about **gravity** and light.

What Was Isaac's Childhood Like?

Isaac was born on 25th December 1642 in the village of Woolsthorpe in Lincolnshire. When he was a child, he spent a lot of time living with his grandmother before being sent to **boarding school**.

Did You Know...?

Isaac's mother wanted him to become a farmer and manage the family farm. However, he preferred to research and study.

What Did Isaac Learn About?

Isaac began at the University of Cambridge in 1661 where he started learning about ancient Greek thinkers called Aristotle and Plato. Their ideas about the world were believed to be the most important at that time. Isaac learnt a lot from Aristotle and Plato but he started to become interested in the new ideas about science which were becoming popular. He was keen to find new and different ways of explaining nature and the world around him.

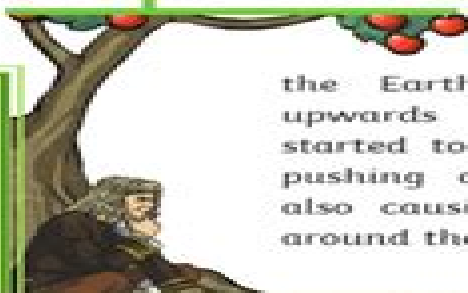

What Scientific Discoveries Did Isaac Make?

Isaac carried out lots of experiments while in his hometown of Woolsthorpe. He started to experiment with light and he found that when white light passes through a **prism**, it separates into many different colours. This led him to discover that white light is made up of a mixture of colours called a spectrum.

Did You Know...?

Isaac spent a lot of time at home on the family farm in Lincolnshire because of an outbreak of the **plague** in Cambridge.

Many people tell the story of how Isaac discovered gravity while sitting under a tree in an orchard. It is said that an apple fell from the tree and landed on Isaac's head. This made him wonder why objects fall to the ground. Isaac wanted to understand why it is that things fall downwards towards the Earth instead of floating upwards into space. He then started to realise that this same pushing and pulling force was also causing the Moon to **orbit** around the Earth.
