

ISS45 V8 ↔ ISS45 V7

Two outstanding POS systems. Alike yet different. StoreNext presents these variations for your consideration.

ISS45 V7's "3 R's" highlighted POS architecture and stability. Now V8 sets new standards for depth, power and capability.

ISS45 offers independent grocers and regional chains a fortunate choice. With its rock-solid performance and architecture featuring not dual, but triple POS replication, the original ISS45 V7 has been a foundation product in StoreNext's line. And with thousands satisfied stores, you can rest assured of a long future of support.

And then going forward, there's ISS45 V8 with its matchless combination of the latest features, standardized data and sheer system power that has become the envy of an industry of also-rans.

The ISS45 you choose will depend on the areas that are most important to your own operations, plans, and key business drivers. Here is a brief description of the primary differences to assist in your decision.

- **System environment** — for the ability to anchor a store's information technology, interfacing with a wide variety of StoreNext and third-party products, both ISS45 V7 and V8 rate an 11 on a scale of 10. Virtually every application for the supermarket business is equally well-supported with refined and stable interfaces into either system. And as for StoreNext's own ancillary systems, you will find all the features of StoreNext

Connected Services, RBO, Retail Store (TCL), PocketOffice, U-Scan, Price Electronic Shelf Labels, IBM or Fujitsu hardware, SIL communications, WinEPS or Connected Payments and so forth equally well integrated, certified, packaged, released and supportable whether your choice is ISS45 V7 or V8.

- **The 3 R's: Replication, Resiliency and Recovery** — Both ISS45 V8 and V7 POS terminals can operate independently from the central controllers. PLL/Item files, clerk/manager files, in-house check authorization files, promotions — even transaction suspend/recall files — are resident in every POS terminal. This is why StoreNext can say "If your terminal has electricity, you can check out your shopper!" ISS45 V8 employs one primary file controller housing the central system with a backup client. ISS45 V7, however, provides a dual set of balanced system controllers and all system functions — POS, Controller Services, Office and Communications — can run in duplicate mode. And with both V8 and V7 system takeovers, and recovery to complete system operation, is fully automatic with no requirement for operator intervention.
