**EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility** Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between

competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject

### **The Regionalisation of Competition Law and Policy within the ASEAN Economic Community** Burton

Ong, 2018-03-01 This edited volume of essays examines a wide range of issues related to the regionalisation of competition policy in South East Asia where the ten member states of ASEAN have launched the ASEAN Economic Community AEC Written by a diverse group of academics practitioners and policy makers this book explores issues such as the role of competition policy in facilitating the market integration ambitions of the ASEAN member states the challenges arising from divergences in the national competition law regimes of the ASEAN member states and the absence of a supranational legal framework and the future of competition policy in light of the AEC Blueprint 2025 Given the nexus between regional competition policy and regional market integration this book will be of particular interest to lawyers economists and policymakers working in the fields of competition law and regional trade law

### **The Concept of Abuse in EU**

**Competition Law** Pinar Akman, 2012-02-03 The objectives of Article 102 TFEU what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled This lack of clarity creates uncertainty for businesses and coupled with the current state of economics in this area raises an important question of legitimacy Using law and economic approaches this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting abuse In doing so this book establishes an overarching concept of abuse that conforms to the historical roots of the provision to the text of the provision itself and to modern economic thinking on unilateral conduct This book therefore inquires into what Article 102 TFEU is about what it can be about and what it should be about regarding both objectives and scope The book demonstrates that the separation of exploitative abuse from exclusionary abuse is artificial and unsound It examines the roots of Article 102 TFEU and the historical context of the adoption of the Treaty the case law policy and literature on exploitative abuses and where relevant on exclusionary abuses The book investigates potential objectives such as fairness and welfare as well as the potential conflict between such objectives Finally it critically assesses the European Commission's modernisation of Article 102 TFEU before proposing a reformed approach to abuse which is centred on three necessary and sufficient conditions exploitation exclusion and a lack of an increase in efficiency

**Cartel Regulation** Caron Beaton-Wells, Brent Fisse, 2011-04-25 Cartel regulation is a prime element of competition policy and an essential means of minimising the adverse effects of cartel activity on economic welfare. However, effective cartel regulation poses distinct challenges for governments, competition authorities, and commentators across the globe. In *Australian Cartel Regulation*, leading competition law experts Caron Beaton Wells and Brent Fisse reflect on developments in anti-cartel law in Australia over the last 30 years. They provide a comprehensive account of the current law on cartels as well as discussing key issues that may arise in the future. This definitive volume not only identifies the practical and theoretical issues but also recommends workable solutions and does so with the benefit of comparative analysis of the anti-cartel laws of major overseas jurisdictions. Many of the issues identified and discussed in *Australian Cartel Regulation* are common to any scheme designed to regulate cartel conduct.

*Railway Reform and Charges for the Use of Infrastructure* European Conference of Ministers of Transport, 2005-11-16 This book explains how barriers to growth in rail freight transport across Europe can be overcome. It recommends a simple set of charges that create incentives for management and planning of train operations across national borders.

**Understanding the Federal Reserve's Proposed Rule on Interchange Fees** United States. Congress. House. Committee on Financial Services. Subcommittee on Financial Institutions and Consumer Credit, 2011

**The New EU Competition Law** Pablo Ibáñez Colomo, 2023-12-14 This book provides the first comprehensive account of the New EU Competition Law, an emerging understanding of the discipline that breaks from the consensus of the early 2000s and that ventures into uncharted territories. Competition law has undergone fundamental transformations in the past decade from the rise and fall of the effects-based approach to the challenge of Big Tech and the growing interaction with intellectual property. Making sense of these changes and fully grasping their implications can be difficult. The book discusses the shift from traditional enforcement in the industrial era to the sort of intervention that a knowledge-based economy demands. It presents the changes that the field is undergoing, policy priorities, relationship with regulation, and intangible assets move away from efficiency and consumer welfare and illustrates them by reference to the most significant developments. The analysis includes an up-to-date evaluation of the Digital Markets Act and addresses the application of EU competition law to key areas including energy, pharma, telecommunications, and online platforms. Conceived as a modular book, practitioners and advanced students will find it useful as a map to navigate the underlying trends and as an in-depth dissection of the key case law and administrative practice of the past decade.

**Competition Law in Kenya** Brenda Pamela Mey, 2017-11-20 Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this practical analysis of competition law and its interpretation in Kenya covers every aspect of the subject: the various forms of restrictive agreements and abuse of dominance prohibited by law; the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies; and criminal penalties and raising challenges to administrative decisions. Judicial Review of Competition Law Enforcement in the EU Member States and the UK Maciej Bernatt, Francisco Marcos, Annalies Outhuijse, 2024-09-17 International Competition Law Series 91 Enforcement of competition law often calls

for a complex economic and legal assessment and the review of those enforcement decisions usually falls to national courts. In this connection however European competition law and legal scholarship have offered scant guidance on how judicial review should and does function. This book the first comprehensive systematic and comparative empirical study of judicial review of competition law public enforcement in the EU and the UK provides a thorough understanding of the practical operation of the role of judicial review in competition enforcement. A country by country analysis along with a detailed introduction and an incisive comparative summary covers all publicly available judicial review judgments 5 707 in all of final public enforcement actions in relation to Articles 101 and 102 TFEU and relevant national provisions in the twenty seven EU Member States and the UK rendered between 1 May 2004 and 30 April 2021. The data presented draws on a rich database built for the purpose of this study by twenty eight national teams of competition law academics and practitioners. For each jurisdiction the analysis focuses on such aspects as the following structure of the national enforcement system number of judgments rendered success rate types of appellants competition rules subject to review grounds of review use of preliminary references appeals involving leniency and or settlements and role of third parties. Numerous graphs figures and tables support the presentation. In the light it sheds on trends in judicial review of competition law enforcement on a comparative basis and in its data driven assessment of how the decentralised judicial review of EU competition law meets EU integration aims this important study will be of inestimable value to competition lawyers policymakers and academics in developing a confident understanding of precisely how judicial review in this area operates in each of the EU Member States and the UK. In addition the book provides a significant contribution not only with respect to EU and national competition laws but also more broadly to comparative administrative law scholarship in Europe.

**Regulating Big Tech** David R. Gilchrist, PhD, LL.M., SJD, 2024-12-20. Dear We the People Daily global news supports the relevant importance of well considered solutions to regulating Big Tech in response to the clash of constitutional restraint agency regulation and corporate actions. Technology's innovative networks have invaded business and economic structures. The simple has morphed into the complex while no effective method of meaningful enforcement is found within current law. Legal immunity grants expansive freedom from accountability and corporate responsibility the ramifications are far reaching and widespread indeed worldwide. Cultural norms of national regimes shape their approach to violations of anticompetitive activity. The United States

solely has criminal restraining regulatory enforcement Why is that How effective is the civil restraining enforcement The media publicizes financial fines intended to restrain and yet are corporately considered merely the cost of doing business The public's accommodation becomes inevitable as the legal system loopholes surpass any legal restraint while hoodwinking deception slowly walks the penalizing remedy The objective herein is to effectively distill humanity's psyche through the lens of history sociology law and economics giving the reader a rich and comprehensive understanding of foundational status quo and a context for implementing retaliatory strategy At stake is the consequential welfare of consumers who find themselves in uncharted territory without effective advocacy The resultant challenging competition marketplace is a difficult environment for consumers and competitors alike My singular goal is to provide perspective of how things should function do function and can function for the betterment of the citizens of this interconnected world We are not just residents indeed citizenry is a participatory designation Accountability safeguards against destruction and it is inclusive We the People are the government not the governed therefore we are accountable to one another It is my great pleasure to share this dialogue with you as we enjoy this reading journey together May my inspiration become your aspiration to enjoin your friends in citizenry participation David R Gilchrist PhD LLM SJD

**OECD Competition Trends 2022** OECD, 2022-02-23 The third edition of OECD Competition Trends covers key trends in competition authority resources cartel enforcement abuse of dominance cases merger review and advocacy The analysis is based on six years of data between 2015-20 for 73 OECD and non OECD jurisdictions The report also considers the potential impact of COVID-19 on competition enforcement trends and includes a spotlight chapter on leniency [European Union Competition Policy versus Industrial Competitiveness](#) Hikaru Yoshizawa, 2021-11-10 The book examines whether EU competition policy is applied fairly and consistently to EU and non EU firms despite persistent political pressure from member states for a relaxation of the rules and deals with the dilemma of regional organisations in the global political economy Focussing on the EU's desire to achieve balance between the promotion of market competition and the enhancement of international competitiveness the book explores the validity of its attempts successfully to ensure a stringent competition policy which is nationality blind and comparatively strict Finally it shows that the competition competitiveness dilemma remains unresolved because the EU's capability to set global regulatory standards is constrained by competition and the need to engage in multilateral forums such as the WTO and the International Competition Network This book will be of key interest to scholars and students of European Union studies EU competition law and policy EU external action and more broadly to global governance international political economy and international relations The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license [Dalhuisen on Transnational and Comparative Commercial, Financial and Trade Law Volume 2](#) Jan H Dalhuisen, 2022-04-07 remains a must read for practitioners and academics interested in more than the substantive law of trans border commercial activity King's Law Journal Volume 2 of

this new edition covers the transnationalisation of dispute resolution especially arbitration and contains a critical analysis of the main challenges to its success continuing credibility and effectiveness The volume distinguishes between commercial financial and foreign investment arbitration and concentrates on the status role and reasoning of international arbitrators their limited powers especially in matters of public policy and in property matters the threat of judicialisation and the need to connect with mediation and a settlement ethos The complete set in this magisterial work is made up of 6 volumes Used independently each volume allows the reader to delve into a particular topic Alternatively all volumes can be read together for a comprehensive overview of transnational comparative commercial financial and trade law      *European Access* ,2001
